Amendment 12 to the Fishery Management Plan for the Scallop Fishery off Alaska

1. Add the following paragraph to the end of section 1.1 to read as follows:

Amendment 12: Revise the Boundaries of the Aleutian Islands Habitat Conservation Area (AIHCA)

In March 2007, the Council recommended revising the boundaries of the AIHCA. Certain waters near Agattu Island were to be opened to nonpelagic trawling based on historical fishing activity and no evidence of sensitive habitat. Certain waters near Buldir Island have documented occurrence of coral and sponges and little fishing activity. These Buldir Island waters are closed under this amendment.

2. Revise the figure and coordinates for the AIHCA in Appendix D as follows:
    a. In section 3.3.2, replace the table with the following table.

Name	Latitude			Longitude			Footnote

Note: Unless otherwise footnoted, each area is delineated by connecting in order the coordinates listed by straight lines. Except for the Amlia North/Seguam donut and the Buldir donut, each area delineated in the table is open to nonpelagic trawl gear fishing. The remainder of the entire Aleutian Islands subarea and the areas delineated by the coordinates for the Amlia North/Seguam and Buldir donuts are closed to nonpelagic trawl gear fishing, as specified at § 679.22. Unless otherwise noted, the last set of coordinates for each area is connected to the first set of coordinates for the area by a straight line. The projected coordinate system is North American Datum 1983, Albers.

[1]The connection of these coordinates to the next set of coordinates is by a line extending in a clockwise direction from these coordinates along the shoreline at mean lower-low water to the next set of coordinates.

[2]The connection of these coordinates to the next set of coordinates is by a line extending in a counter clockwise direction from these coordinates along the shoreline at mean lower-low water to the next set of coordinates.

[3]The connection of these coordinates to the first set of coordinates for this area is by a line extending in a clockwise direction from these coordinates along the shoreline at mean lower-low water to the first set of coordinates.

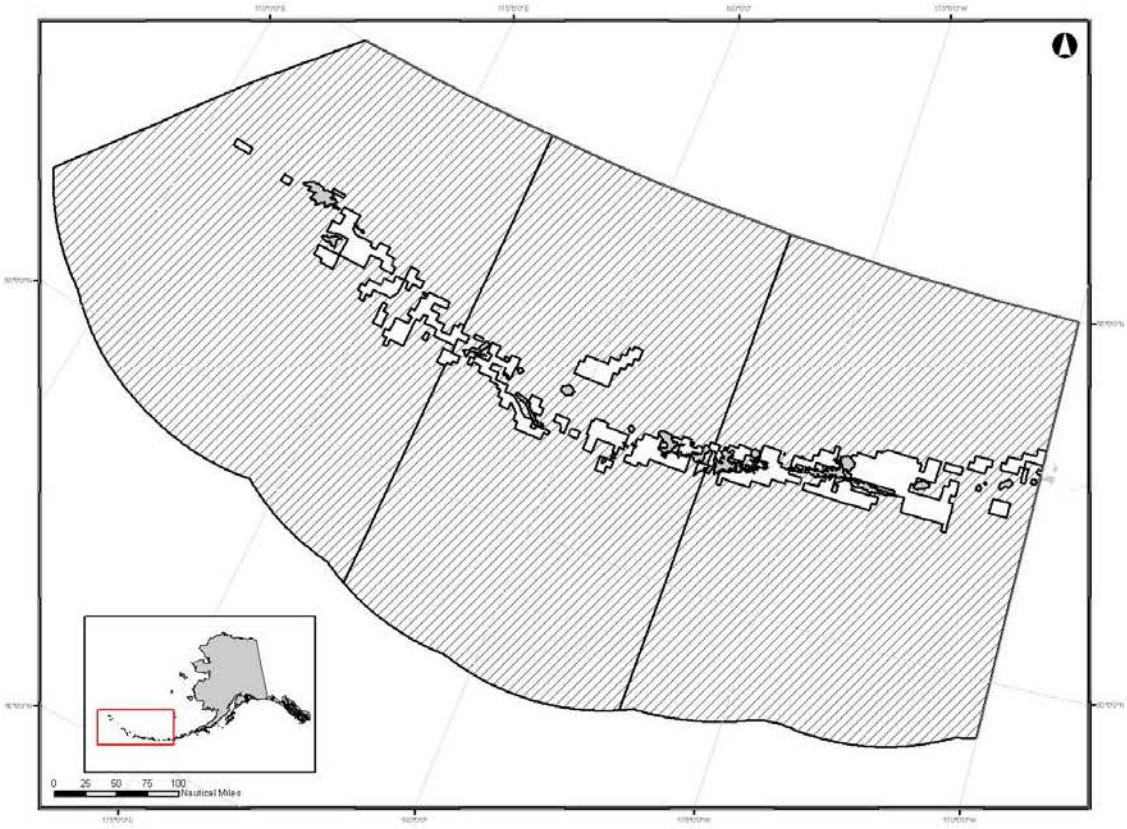
[4]The connection of these coordinates to the first set of coordinates for this area is by a line extending in a counter clockwise direction from these coordinates along the shoreline at mean lower-low water to the first set of coordinates.

[5] The area specified by this set of coordinates is closed to fishing with non-pelagic trawl gear.

[6] This set of coordinates is connected to the first set of coordinates listed for the area by a straight line.

[7]The last coordinate for the donut is connected to the first set of coordinates for the donut by a straight line.

b. Replace Figure 5 with the following figure. Note the figure heading will remain the same.



0 25 50 75 100
Nautical Miles
