1.0 PARTIES

The parties to this implementation agreement ("Agreement") are Green Diamond Resource Company ("Green Diamond"); the National Marine Fisheries Service ("NMFS"); and the United States Fish and Wildlife Service ("USFWS"). In this Agreement, these entities may be referred to collectively as the "Parties" and each individually as a "Party." Further, USFWS and NMFS may be collectively referred to as the "Services."

2.0 RECITALS AND PURPOSES

2.1 Recitals. The Parties have entered into this Agreement in consideration of the following facts:

(a) Green Diamond owns or conducts timber operations on approximately 416,531 acres of commercial timberland in Humboldt County and Del Norte County in Northern California, which lands have been determined to provide, or potentially provide, habitat for the following species listed under the Endangered Species Act ("ESA"): the Southern Oregon/Northern California Coast Evolutionarily Significant Unit ("ESU") of coho salmon, the California Coastal ESU of chinook salmon, and the Northern California Distinct Population Segment ("DPS") of coastal steelhead, each of which are under the jurisdiction of NMFS;

(b) These lands have also been determined to provide, or potentially provide, habitat for the following unlisted species: the Klamath Mountains Province ESU of steelhead, the Southern Oregon/Northern California Coastal ESU of chinook salmon, and the Upper Klamath/Trinity Rivers ESU of chinook salmon, which are under the jurisdiction of NMFS; and the coastal cutthroat trout, the rainbow trout, the southern torrent salamander, and the tailed frog, which are under the jurisdiction of USFWS;

(c) Green Diamond, with technical assistance from the Services, has prepared an aquatic Habitat Conservation Plan ("AHCP") covering the listed and unlisted fish species under the jurisdiction of NMFS and a Candidate Conservation Agreement With Assurances ("CCAA"), covering the unlisted amphibian and fish species subject to the jurisdiction of USFWS. The AHCP and CCAA are collectively referred to herein as the "Plan;" and

(d) Green Diamond has developed a series of measures, described in the Plan, to minimize the impacts of taking of the covered species incidental to Green Diamond's covered activities and to meet other applicable requirements of the ESA and implementing regulations to support the issuance of (i) an incidental take permit ("ITP") by NMFS pursuant to ESA Section 10(a)(1)(B) covering the listed and unlisted species under its jurisdiction and (ii) an enhancement of survival permit ("ESP") by USFWS pursuant to ESA Section 10(a)(1)(A) covering certain unlisted fish and amphibian species in the event that such species are listed as threatened or endangered in the future by USFWS.

2.2 Purposes. The purposes of this Agreement are:

(a) To ensure implementation of each of the terms of the Plan's Operating Conservation

Program;

(b) To describe remedies and recourse should any Party fail to perform its obligations as set forth in this Agreement; and,

(c) Subject to Section 4.2.2 of this Agreement, to provide assurances to Green Diamond that, pursuant to the "No Surprises" regulations, as long as the obligations of the Plan, the Permits and this Agreement are performed, no additional mitigation shall be required of Green Diamond with respect to covered species, except as provided for in this Agreement or required by law.

3.0 DEFINITIONS

The following terms as used in this Agreement shall have the meanings set forth below:

3.1 Terms Defined in Endangered Species Act. Terms used in this Agreement and specifically defined in the ESA or in regulations adopted by the Services under the ESA have the same meaning as in the ESA and those implementing regulations, unless this Agreement expressly provides otherwise.

3.2 "Changed Circumstances" means "changes in circumstances affecting a species or geographic area covered by a conservation plan that can reasonably be anticipated by plan developers and the Services and that can be planned for (e.g., the listing of a new species, or a fire or other natural catastrophic event in areas prone to such events)." 50 CFR §§ 17.3, 222.102. Changes that will constitute Changed Circumstances, and the responses to those circumstances, are described in Plan Section 6.2 and Paragraph 9.1 herein. Changed Circumstances are not Unforeseen Circumstances.

3.3 "Covered Activities" means certain activities carried out by Green Diamond in the Plan Area that may result in incidental take of Covered Species and all those activities necessary to carry out the commitments reflected herein and in the Plan's Operating Conservation Program. For purposes of this Agreement, Covered Activities means all those activities and measures described in Plan Section 1.3.4. Covered Activities includes the development of new rock quarries in the Plan Area when Green Diamond: (A) completes a pre-project record search by providing the Yurok Tribal Historic Preservation Officer (YTHPO) with written notice showing the location of the proposed new rock quarry and a request for comment within fifteen (15) days concerning the potential existence of any historic properties within the proposed project area; (B) completes a pre-project field survey for archaeological and historical sites in the proposed quarry area using a registered professional forester who has received training on methods to survey for and identify such sites; and (C) notifies the Services when an archaeological or historical site has been identified or discovered that will be affected by the development of the proposed quarry. Upon such notification by either Green Diamond, or the YTHPO, the Services shall consult with the State Historic Preservation Officer or YTHPO, as appropriate, and Green Diamond to ensure that the effects, if any, of the quarry development on archeological and historic properties are taken into account in accordance with the National

Historic Preservation Act (NHPA). Covered Activities does not include any quarry development project that Green Diamond describes in a notice of exclusion provided by Green Diamond to the Services and stating that Green Diamond elects to forego the completion of a pre-project investigation or consultation for purposes of NHPA review.

3.4 “Covered Species” means the following species, each of which the Plan addresses in a manner sufficient to meet all of the criteria for issuing an ITP under ESA Section 10(a)(1)(B) and all of the criteria for issuing an ESP under ESA Section 10(a)(1)(A), as applicable: coho salmon (Southern Oregon/Northern California Coast ESU); chinook salmon (California Coastal ESU; Upper Klamath/Trinity Rivers ESU; and Southern Oregon and Northern California Coast ESU); steelhead (Northern California DPS and Klamath Mountains Province ESU); coastal cutthroat trout; rainbow trout; the southern torrent salamander; and the tailed frog.

3.5 “Effective Date” means July 1, 2007.

3.6 “HPA” means one of the eleven hydrographic planning areas, referred to herein as the “Eleven HPAs,” described in Plan Section 1.3.2.4 and delineated in Plan Figure 1-1 and Table 1-1.

3.7 “Listed Species” means a species (including a subspecies, or a distinct population segment of a vertebrate species) that is listed as endangered or threatened under the ESA.

3.8 “Operating Conservation Program” means those conservation management activities which are expressly agreed upon and described in a conservation plan or its implementing agreement and which are to be undertaken for the affected species when implementing an approved conservation plan, including measures to respond to changed circumstances. 50 CFR §§ 17.3, 222.102. Where an applicant qualifies for no surprises assurances, and additional conservation and mitigation measures are deemed necessary to respond to unforeseen circumstances, requirements for such additional measures are “limited to modifications within . . . the conservation plan’s operating conservation program for the affected species” and the Services must maintain the original terms of the conservation plan to the maximum extent possible. 50 CFR §§ 17.22(d)(5)(iii)(B), 222.307(g)(3)(ii). For purposes of this Agreement, the conservation management activities and specific measures which are the Operating Conservation Program, which also includes provisions for changed circumstances, funding, monitoring, reporting, adaptive management, and dispute resolution, are set forth in Plan Section 6.2.

3.9 “Permit” or “Permits” means the incidental take permit issued by NMFS to Green Diamond pursuant to ESA Section 10(a)(1)(B) (“ITP”) or the enhancement of survival permit issued by USFWS to Green Diamond pursuant to ESA Section 10(a)(1)(A) (“ESP”), or both the ITP and the ESP for take incidental to the Covered Activities in the Plan Area, as either Permit may be amended from time to time.

3.10 “Plan” means that certain Aquatic Habitat Conservation Plan and Candidate Conservation Agreement with Assurances prepared by Green Diamond, described in Paragraph 2.1(c), and dated October 2006.

3.11 Plan Area Terms

3.11.1 “Plan Area” means the geographic area in which Covered Activities will occur, where incidental take is authorized and where the Operating Conservation Program will be implemented. For the purposes of this Agreement, the Plan Area includes all lands within Green Diamond’s ownership at any time during the term of the Permits within the Eligible Plan Area, subject to the limitations of Paragraph 11 herein, and up to 100 miles of roads on lands where Green Diamond owns and exercises Road Access Rights within its approved timber harvesting plan (“THP”) areas in the Eligible Plan Area during the term of the Permits. Except where stated otherwise in this Agreement, references to lands, commercial timberlands and Green Diamond’s ownership in the context of the Plan Area include lands owned in fee and lands subject to Harvesting Rights. These are the lands over which Green Diamond currently has sufficient legal control or, as lands are added to the Plan Area pursuant to Paragraph 11.2, represents that it will have sufficient legal control during the term of the Permits to implement the Plan’s Operating Conservation Program.

3.11.2 “Eligible Plan Area” means all privately-owned commercial timberlands within the Eleven HPAs that, over the life of the Plan, either are included within the Plan Area or are eligible for inclusion in the Plan Area pursuant to Paragraph 11.2. This is the entire commercial timberland acreage analyzed in the Plan and the Environmental Impact Statement (“EIS”) prepared pursuant to the National Environmental Policy Act (“NEPA”) to support the Plan’s provisions allowing for additions and deletions of lands from the Plan Area for the term of the Plan and Permits. Plan Figure [1-2] identifies the Eligible Plan Area that is approximately [683,673] acres.

3.11.3 “Initial Plan Area” means Green Diamond’s ownership within the Eleven HPAs as of the Effective Date of the Permits, as generally depicted in Figure 1-1 of the Plan, which totals 416,531 acres. This figure will be adjusted to the actual ownership as of the Effective Date. Within 30 working days of the Effective Date, Green Diamond will provide the Services with a revised acreage total for the Initial Plan Area, a revised map (Figure 1-1) and GIS coverage of the Initial Plan Area as of the Effective Date of the Permits. The Green Diamond GIS information will include a data dictionary and base layers of ownership boundaries (including areas where Green Diamond retains harvesting rights), roads, and Class I, II, and III watercourses. Within 30 working days of permit issuance, Green Diamond will also provide the Services with the Natural Resource Conservation Service’s STATSGO (1:100,000 soils data) for the Initial Plan Area. All information provided by Green Diamond will represent the most current attribute data available from the Green Diamond GIS.

3.11.4 “Harvesting Rights” means rights to conduct timber operations on lands owned in fee by another. Short-term harvesting rights generally expire upon the conclusion of timber operations, upon a date certain or a combination of the two. Perpetual harvesting rights

pertain to existing and subsequent crops of timber and continue without expiration. Lands on which Green Diamond holds Harvesting Rights may be included in the Plan Area only where Green Diamond has sufficient legal control during the term of the Permits to implement the Plan's Operating Conservation Program.

3.11.5 "Road Access Rights" means rights to construct and use roads on lands outside Green Diamond's ownership pursuant to an access agreement with the fee owner.

3.12 "Take" means "to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct." 16 USC § 1532(19). "Harm" means an act that actually kills or injures fish or wildlife, which act may include significant habitat modification or degradation which actually kills or injures fish or wildlife by significantly impairing essential behavioral patterns, including for USFWS species breeding, feeding or sheltering and for NMFS species breeding, spawning, rearing, migrating, feeding or sheltering. 50 CFR §§ 17.3, 222.102.

3.13 "Unforeseen Circumstances" means changes in circumstances affecting a species or geographic area covered by the Plan that could not reasonably have been anticipated by Green Diamond or the Services at the time of the Plan's negotiation and development, and that result in a substantial and adverse change in the status of the covered species. 50 CFR §§ 17.3, 222.102.

3.14 "Unlisted Species" means a species (including a subspecies or a distinct population segment of a vertebrate species) that is not listed as endangered or threatened under the ESA.

4.0 OBLIGATIONS OF THE PARTIES

4.1 Obligations of Green Diamond. During the term of this Agreement, Green Diamond shall fully and faithfully perform and carry out all of the following:

- (a) Each obligation assigned to Green Diamond under this Agreement;
- (b) Each measure set forth in the Operating Conservation Program including, without limitation, management prescriptions, funding, monitoring, reporting, adaptive management, dispute resolution and responses to Changed Circumstances;
- (c) Written notification to USFWS a minimum of 30 days in advance of any anticipated incidental take of a Covered Species under USFWS jurisdiction from a Covered Activity in the Plan Area. To satisfy this requirement, Green Diamond agrees to provide USFWS with copies of all maps submitted in support of Green Diamond's applications for Streambed Alteration Agreements pursuant to California Fish and Game Code Section 1600 *et seq.* 50 CFR § 17.32 (d)(3)(ii) requires that the recipient of an ESP provide the USFWS with notice and a reasonable opportunity to translocate individuals of the covered ESP species before any expected authorized incidental take occurs. Authorized take of covered ESP species may occur incidental to timber harvest operations, including such operations pursuant to THPs

approved by the California Department of Forestry and Fire Protection ("CDF"), as well as other ongoing and continuous Covered Activities as described in the Plan, particularly where those covered activities involve disturbance of Class I and II watercourses. However, there is no information to accurately predict which specific THP or Covered Activity may result in take. Therefore, providing these maps, which include information on Covered Activities that may cause disturbance of Class I and II watercourses, along with the notices of THPs provided pursuant to Plan Section 6.2, is deemed to provide the notice required by 50 CFR § 17.32 (d)(3)(ii);

(d) Providing notice of land transactions pursuant to Paragraph 8.2 of this Agreement;

(e) Providing notification to the Services if the procedural or substantive protections applicable to historic properties under the State review processes (the California Environmental Quality Act and implementing guidelines, and the California Forest Practice Rules) change or otherwise end;

(f) Completion of a pre-project record search by providing the Yurok Tribal Historic Preservation Officer (YTHPO) with written notice showing the location of a proposed new rock quarry and a request for comment within fifteen (15) days concerning the potential existence of any historic properties within the proposed project area;

(g) Completion of a pre-project field survey for archaeological and historical sites in a proposed quarry area using a registered professional forester who has received training on methods to survey for and identify such sites; and

(h) Providing notification to the Services when an archaeological or historical site has been identified or discovered that will be affected by the development of a proposed quarry.

4.2 Obligations of the Services. Upon execution of this Agreement by all Parties, and satisfaction of all other applicable legal requirements, NMFS shall issue Green Diamond a Permit under ESA Section 10(a)(1)(B), authorizing incidental take by Green Diamond of each listed Covered Species resulting from Covered Activities in the Plan Area and, upon its listing, the incidental take by Green Diamond of all currently unlisted Covered Species under NMFS's jurisdiction, and USFWS shall issue Green Diamond an ESP under ESA Section 10(a)(1)(A), authorizing the incidental take by Green Diamond of currently unlisted Covered Species under USFWS's jurisdiction upon the listing of such species.

4.2.1 Permit Coverage. Each Permit shall identify all Covered Species subject to the issuing Service's jurisdiction. The ITP shall take effect for listed Covered Species on the Effective Date. For each unlisted Covered Species, the ITP and ESP shall take effect upon the listing of such species, subject to compliance with all other terms of this Agreement.

4.2.2 "No Surprises" Assurances. Provided that Green Diamond has complied with its obligations under the Plan, this Agreement, and the Permits, the Services can require

Green Diamond to provide mitigation beyond that provided for in the Plan only under Unforeseen Circumstances in accordance with the “no surprises” regulations. If the governing regulations should be modified from those codified at 50 C.F.R. §§ 17.22(b)(5), 17.32(b)(5), 222.22(g), as of the Effective Date, the modified regulations shall not apply unless reliance on the regulations in effect as of the Effective Date is prohibited by statute or court order.

4.3 Interim Obligations upon a Finding of Unforeseen Circumstances. If one of the Services makes a finding of Unforeseen Circumstances, it shall have up to 120 days, or a longer period with Green Diamond’s consent, to determine the nature and location of necessary additional or modified mitigation required to address the Unforeseen Circumstances. During such period, Green Diamond agrees to avoid undertaking any activity that would appreciably reduce the likelihood of the survival and recovery of the affected Covered Species.

4.4 Activities Undertaken Pursuant to THPs Approved Prior to the Effective Date. The Plan, the Permits, and this Agreement shall not apply to any activities undertaken by Green Diamond pursuant to a THP approved by CDF prior to the Effective Date (“Plan Excluded Activities”), notwithstanding Paragraphs 3.3 or 6.1 of this Agreement. If Green Diamond applies for and receives approval for any THP amendment (as described in the Z’berg-Nejedly Forest Practice Act, section 4591) that includes the Plan Excluded Activities after the Effective Date, then any activities occurring under the amended THP subsequent to the amendment approval date shall be subject from that point forward to the Plan, the Permits, and this Agreement.

5.0 INCORPORATION OF THE PLAN’S OPERATING CONSERVATION PROGRAM

The provisions of the Operating Conservation Program set forth in Plan Section 6.2 are intended to be, and by this reference are, incorporated into this Agreement. In the event of any direct contradiction between the terms of this Agreement and the Plan, the terms of this Agreement shall control. In all other cases, the terms of this Agreement and the terms of the Plan shall be interpreted to be supplementary to each other.

6.0 TERM

6.1 Initial Term. This Agreement and the Plan shall become operative on the Effective Date. This Agreement, the Plan and the Permits shall remain in effect for a period of 50 years from the Effective Date, except as provided below.

6.2 Permit Suspension or Revocation. The Services may suspend or revoke the Permits for cause in accordance with the laws and regulations in force at the time of such suspension or revocation. Such suspension or revocation may apply to either or both Permits in whole or in part, and may apply only to specified Covered Species, portions of the Plan Area, or certain Covered Activities. Suspension or revocation of the Permits will result in suspension or termination, as the case may be, of this Agreement, except that Green Diamond shall carry out the post-revocation mitigation to the extent specified in Paragraph 6.2.1.

6.2.1 Post-Revocation Mitigation. In the event that NMFS revokes the ITP as a result of a violation or violations of the ITP, Green Diamond shall carry out those activities NMFS finds necessary to mitigate any impacts of take of Covered Species arising out of such violation(s) over and above impacts of take authorized by the Plan, in addition to those post-termination mitigation activities specified in Paragraph 6.3. No additional mitigation shall be required in addition to that provided in Paragraph 6.3 if NMFS revokes the ITP for cause other than such a violation. No post-revocation mitigation is required in the event of USFWS revocation of the ESP.

6.3 Relinquishment of the Permits. Green Diamond may relinquish the Permits in accordance with the regulations in force on the date of such relinquishment and this Paragraph 6.3. These regulations currently are codified at 50 CFR §§ 13.26, 17.32(b)(7) and 222.306(d). Unless later modification of these regulations dictate otherwise, to relinquish a Permit issued by USFWS, Green Diamond shall, within 30 calendar days of discontinuing incidental take and the exercise of other rights granted by the Permits and this Agreement, return the Permit to the issuing office together with a written statement surrendering the Permit for cancellation. Relinquishment of the Permits will result in termination of this Agreement except that Green Diamond shall carry out those post-relinquishment activities specified in Paragraph 6.3.2.

6.3.1 Green Diamond's Commitments upon Relinquishment. In the event Green Diamond decides to relinquish the ITP issued by NMFS before expiration of the full term of the Permit, Green Diamond shall ensure that the following occurs:

(a) Green Diamond shall provide notice to NMFS at least 120 days prior to a planned relinquishment;

(b) In all areas where Green Diamond has conducted Covered Activities and applied the Operating Conservation Program's prescriptions, Green Diamond shall maintain those prescriptions in such areas for the remainder of the 50 year term that the Plan would have been in effect absent relinquishment, subject to the provisions on land transactions and Plan Area adjustments in Paragraph 11;

(c) For any transfer of lands subject to (b), Green Diamond agrees to include the provisions of (b) in a deed restriction (in a form approved by the Services) that provides that such restrictions are intended to be enforceable by the Services and Green Diamond;

(d) If the relinquishment occurs in any calendar year in which Covered Activities have already occurred, Green Diamond will complete, by the end of that calendar year, all Road Management Measures set forth in Plan Section 6.2.3, including accelerated road maintenance provisions of Plan Section 6.2.3.2.1, that were scheduled and budgeted and which would have been required to be completed by the end of that calendar year if the Plan and Permits had remained in effect; and

(e) On or before March 31 of the year following any relinquishment, Green Diamond shall submit a report to the Services detailing the status of Green Diamond's compliance with the

terms of the Operating Conservation Program through the end of the calendar year in which relinquishment or termination occurs. Green Diamond agrees to cooperate with the Services in their review of this report to insure completion of all tasks planned for that year, and the Parties may use the dispute resolution mechanisms set forth in Paragraph 13.6 to resolve any disputes over Green Diamond's obligations. No other post-relinquishment mitigation shall be required.

6.3.2 Post-Relinquishment Mitigation. No post-relinquishment mitigation is required of Green Diamond in the event of early relinquishment of the ESP. With regard to the NMFS Permit, as designed and as analyzed in the Plan, the measures provided in Plan Section 6.2, along with Green Diamond's commitments in Paragraph 6.3.1 of this Agreement, are intended to result in Green Diamond having fully and continuously fulfilled its obligations under the Permits and this Agreement such that no additional post-relinquishment mitigation is required. Upon any revocation or relinquishment of the Permits and upon satisfaction of Green Diamond's post-relinquishment commitments pursuant to Paragraph 6.3.1, and in the absence of the imposition of additional requirements pursuant to a Permit revocation pursuant to Paragraph 6.2.1, Green Diamond will be deemed to have fully and completely satisfied its obligations under the Permits, including those to minimize and mitigate the impacts of take that may occur incidental to the Covered Activities on the Covered Species within the Plan Area before or as those impacts arise.

6.3.3 Cancellation of ITP upon Relinquishment. After Green Diamond relinquishes the ITP, it shall be deemed cancelled upon Green Diamond's satisfaction of its post-relinquishment mitigation commitments pursuant to Paragraph 6.3.1. Upon surrender of the ITP, no further take shall be authorized under the terms of the ITP.

6.4 Treatment of Unlisted Species. For purposes of Paragraph 6.3, unlisted Covered Species shall be treated as though they are listed species in determining the amount of take and the mitigation required in the case of revocation or relinquishment of the ITP.

6.5 Extension of the Permits. Upon agreement of the Parties and compliance with all applicable laws, the Permits may be extended beyond the initial term under regulations of the Services in force on the date of such extension. If Green Diamond desires to extend the Permits, it shall so notify the Services at least 180 days before the then-current term is scheduled to expire. Extension of the Permits constitutes extension of the Plan and this Agreement for the same amount of time, subject to any modifications that the Services may require under regulations of the Services in force at the time of extension.

7.0 FUNDING

Green Diamond warrants that it has, and shall expend, such funds as may be necessary to fulfill its obligations under the Operating Conservation Program. Green Diamond shall promptly notify the Services of any material change in Green Diamond's financial ability to fulfill its obligations. In addition, in order to ensure that adequate funding will be provided for the Acceleration of the Road Implementation Plan (Plan Section 6.2.3.2.1) and the Monitoring Projects and Programs (Plan Section 6.2.5.2), which are the requirements of the Operating Conservation Program that

have material out-of-pocket costs for the first 15 years of the Plan, Green Diamond shall, by March 15 of each year during the first 15 years of the original term (except to the extent the 15-year period is adjusted as discussed in Plan Section 6.2.3.2.3) provide the Services with:

(a) A letter from Green Diamond's General Manager or Vice-President with authority over the Green Diamond's California operations (the "General Manager Letter") verifying that an accounting reserve has been established for that fiscal year in an amount adequate to assure compliance with Plan Sections 6.2.3.2.1 and 6.2.5.2 for that fiscal year. The amount of the reserve shall reflect the amount shown in the budget pursuant to Paragraph 8.1(b), less One Million Dollars (\$1,000,000), which reflects the estimated cost of annual road upgrading and decommissioning carried out prior to the Effective Date, but in no event shall the established amount of the reserve be less than Two Million Dollars (\$2,000,000). The General Manager Letter also shall set forth the change to Plan Area acreage since the prior year's Letter that provides the basis for the annual adjustment to the Acceleration of the Road Implementation Plan financial commitment pursuant to Plan Section 6.2.3.2.1.4. Attached to the General Manager Letter shall be a directive from Green Diamond's Chairman or President to budget the funds needed to assure the commitments of Plan Sections 6.2.3.2.1 and 6.2.5.2 are met and to expend in that fiscal year the budgeted funds to the extent needed to fully implement those commitments. By March 1 of each calendar year during the first 15 years of the original term, Green Diamond shall provide the Services, at the reporting address set forth in Paragraph 8, with a letter from a third party auditor confirming that Green Diamond has established an accounting reserve in the amount of \$1.5 million (adjusted for inflation as provided in Plan Section 6.2.3.2.1) plus a reasonable estimate of the incremental costs of monitoring (over and above the monitoring costs that Green Diamond would incur absent the Plan and Permits) for that calendar year in order to assure compliance with the Road Implementation Plan and monitoring requirements of the Operating Conservation Program (as provided above, this total amount will be no less than \$2,000,000).

(b) A schedule of reserves accrued pursuant to subparagraph (a) above at Green Diamond's most recent fiscal year end, accompanied by a report from an independent certified public accountant that states that the schedule fairly presents, in all material respects, the reserves accrued under subparagraph (a) above.

Further, Green Diamond shall submit the budget as provided in Paragraph 8.1(b).

8.0 MONITORING AND REPORTING

8.1 Biennial Reports. Green Diamond shall submit biennial reports describing:

(a) Its activities pursuant to the Operating Conservation Program, including any responses to Changed Circumstances, and the prior two (2) years' results of the monitoring program provided for in the Operating Conservation Program;

(b) A detailed budget setting forth those measures pursuant to the Operating Conservation Program that require out-of-pocket expenditures (e.g., road assessment, road

decommissioning, geologic mapping) that Green Diamond will implement in each subsequent calendar year before the next biennial report is due, and the funds budgeted for those purposes; and

(c) A summary of land transactions reported by Green Diamond to the Services pursuant to Paragraph 8.2 and completed in accordance with Paragraphs 11 and 12 of this Agreement.

The first biennial report shall be due on March 15 following the first full year after the Effective Date and shall be submitted to the Services at the addresses below.

8.2 Reporting of Land Transactions. Green Diamond shall notify the Services of any transfer of ownership of real property or harvesting rights therein subject to this Agreement at the time of the transfer of ownership, except where prior notification occurs pursuant to Paragraph 11. Such notice shall describe the lands to be transferred with particularity, identify the name and address of the transferee and include a detailed map showing the transferred lands.

8.3 Other Reports. Green Diamond shall use its best efforts to provide, within 30 days of being requested by the Services, any additional available information reasonably related to implementation of the Plan in its possession or control, or in the possession or control of any of its affiliates, contractors or other third parties covered by the Permits, that is requested by the Services for the purpose of assessing whether the terms and conditions of the Permits and the Plan, including the Plan's adaptive management plan, are being fully implemented.

8.4 Certification of Reports. All reports shall include the following certification by a responsible company official who supervised or directed preparation of the report:

Under penalty of law, I certify that, to the best of my knowledge, after appropriate inquiries of all relevant persons involved in the preparation of this report, the information submitted is true, accurate, and complete.

8.5 Monitoring by Services. Green Diamond acknowledges that the Services may conduct inspections and monitoring in connection with the Permits in accordance with their regulations and shall cooperate fully in such monitoring. Green Diamond consents to and shall allow entry at any reasonable hour by agents or employees of the Services in the Plan Area where Covered Activities are conducted and premises where records relating to such Covered Activities are kept. Except for inspections performed in connection with an investigation by the Services' law enforcement officers, the Services agree to give Green Diamond reasonable advance notice, i.e., not less than 24 hours, of any inspection so as to provide Green Diamond's representatives with the opportunity to accompany the Services' representatives making such inspection. Except for inspections performed in connection with an investigation by the Services' law enforcement officers, the Services agree not to delegate their rights of inspection hereunder to any other person without Green Diamond's prior consent. Each Service shall ensure that any individual conducting an inspection in the Plan Area on its behalf performs such inspection in a reasonable, safe and professional manner, in compliance with all regulations and statutes applicable to the

Services. The Services shall use reasonable efforts to ensure their representatives participate in the field reviews sponsored by Green Diamond in accordance with Plan Section 6.2.7.4.

8.6 Annual Meetings. Green Diamond and the Services shall conduct annual meetings during the month of May for the first five years following the Effective Date, starting after the first full year of the Plan term. At the first annual meeting, the Services and Green Diamond may discuss an appropriate interval to summarize and report the status of the adaptive management account. At the fifth annual meeting, the Services and Green Diamond will determine the frequency with which Green Diamond will provide the Services with a comprehensive compilation of modifications, amendments and adaptive management changes.

9.0 CHANGED CIRCUMSTANCES

9.1 Changed Circumstances Provided for in the Plan. The Operating Conservation Program and Paragraph 9.3 together contain the complete list of Changed Circumstances and describe those specific conservation and mitigation measures that Green Diamond agrees to implement where, pursuant to the Plan, they are deemed necessary to respond to the Changed Circumstances. Green Diamond shall give notice to the Services within seven days after learning that any of the Changed Circumstances has occurred. As soon as practicable thereafter, but no later than 30 days after learning of the Changed Circumstances, Green Diamond shall modify its activities in the manner described in the Operating Conservation Plan, but only to the extent necessary to mitigate the effects of the Changed Circumstances on Covered Species and shall report its actions to the Services within 15 days after initiating such modifications. In such a case Green Diamond shall include an evaluation regarding longer-term effects of implementing responses to Changed Circumstances in the biennial report. Green Diamond shall make such modifications without awaiting notice from the Services. If the Services determine that Changed Circumstances have occurred and that Green Diamond has not responded in accordance with the Operating Conservation Program, the Services shall so notify Green Diamond and shall direct Green Diamond to make the required changes. Within 30 days after receiving such notice, Green Diamond shall make the required changes and report to the Services on its actions. Such changes are provided for in the Plan, and hence do not constitute Unforeseen Circumstances or require amendment of the Permits or the Plan.

9.2 Changed Circumstances Not Provided for in the Plan. If additional conservation and mitigation measures beyond those provided for in the Operating Conservation Program are deemed necessary to respond to Changed Circumstances, the Services may not require any such additional conservation and mitigation measures without Green Diamond's consent, provided that the Operating Conservation Program is being properly implemented.

9.3 New Listings of Species that are Not Covered Species. In the event that a non-Covered Species that may be affected by Covered Activities becomes listed under the ESA, Green Diamond shall not have incidental take authority with respect to such newly-listed species unless and until the appropriate Permit is amended to include such species or other authorization is provided pursuant to the ESA. Further, Green Diamond acknowledges the authority of the Services to revoke a permit in accordance with Paragraph 6.2. Upon receipt of notice of the

potential listing of a species that is not a Covered Species, Green Diamond shall seek the technical assistance of USFWS and/or NMFS, and, as appropriate, the Services shall provide such assistance, to:

- (i) Identify possible measures to avoid take and avoid causing jeopardy to such species;
- (ii) Determine whether incidental take coverage for such species is appropriate; and, if so;
- (iii) Identify any modifications to the Plan that may be necessary to provide coverage for the new species and assist Green Diamond in determining whether to amend the Plan and the applicable Permit (or, in the case of the USFWS, to seek issuance of an ITP if appropriate) to include the newly-listed species as a Covered Species;

all in the event the species ultimately is listed.

10.0 ADAPTIVE MANAGEMENT

10.1 Adaptive Management. Green Diamond shall implement changes to the Operating Conservation Program in accordance with and subject to the limitations of the adaptive management provisions set forth in Plan Section 6.2.6. Pursuant to the Services' Five Points Policy, there are two ways for Incidental Take permittees to proceed with regard to biological goals and objectives. The first is a results-based HCP, in which the measures incorporated in the HCP are somewhat flexible so long as the results are achieved. In such a case, the HCP's biological goals and objectives can be made the targeted results of the HCP by incorporating them into the HCP's operating conservation program, thereby making their achievement a requirement of the HCP and incidental take permit. The second is a prescription-based approach in which biological goals and objectives guide the development of the specific prescriptions included in the operating conservation program. In this second case, actual achievement of the biological goals and objectives is not required; incidental take permittees are required to implement the prescriptions in the operating conservation program but are not required to achieve the biological goals and objectives to comply with their permits. Green Diamond has elected to proceed in accordance with the latter of these two. In order to qualify for No Surprises assurances, Green Diamond is required only to implement the prescription-based Operating Conservation Program, this Agreement and the terms and conditions of the Permit. See 65 Fed. Reg. 35242, 35251 (June 1, 2000). Accordingly, the Plan's biological goals and objectives set forth in Plan Section 6.1 have guided the development of the Operating Conservation Program's prescriptions. Where the Plan's adaptive management provisions are triggered in the future, Green Diamond will again look to the applicable goals and objectives to guide the development of any changes to the Operating Conservation Program's management practices and measures.

10.2 Adaptive Management Implementation. The Services shall notify Green Diamond if the Services believe that one or more of the adaptive management provisions in the Plan have been triggered and that Green Diamond has not changed its management practices

accordingly as prescribed therein. Within 30 days of such notification, Green Diamond shall initiate the adaptive management changes set forth in the adaptive management program and shall report to the Services on what actions have been taken. Credits and debits to the adaptive management reserve account made in accordance with the provisions of Plan Section 6.2.6.3 will be reflected in the account on an on-going basis, and the status of the account shall be summarized in each biennial report, or at such other interval as is agreed upon at the first Annual Meeting held pursuant to Paragraph 8.6. Changes in management strategies or mitigation measures that are implemented pursuant to the adaptive management program provided for in the Plan do not constitute Unforeseen Circumstances and do not require amendment of the Permits or the Plan.

10.3 No Increase in Take. Plan Section 6.2.6, regarding adaptive management, does not authorize any adaptive management changes that would result in an increase in the amount and nature of take, or increase the impacts of take, of Covered Species beyond that associated with the range of changes analyzed under the Plan, the biological opinions issued in connection with the Permits, and the analysis of the Plan in the EIS prepared in connection with the Permit approvals, including any amendments thereto. Any adaptive management changes outside the scope of the Plan and amendments thereto must be reviewed as a Permit amendment under Paragraph 12.2.

10.4 Reductions in Mitigation. Green Diamond will not implement adaptive management changes outside the scope of the Plan, unless the Services first provide written approval as provided herein. Green Diamond may propose such adaptive management changes by written notice to the Services, specifying the modifications proposed, the basis for them, including supporting data, and the anticipated effects on Covered Species, and impacts to other elements of the human environment. Within 135 days of receiving such a notice, the Services will either approve the proposed changes, approve them as modified by the Services, or notify Green Diamond that the proposed changes constitute Permit amendments that must be reviewed under Paragraph 12.2.

11.0 LAND TRANSACTIONS AND PLAN AREA ADJUSTMENTS

11.1 Acquisition and Sale or Transfer of Land and Harvesting Rights by Green Diamond. Subject to Paragraph 11.3, nothing in this Agreement, the Plan or the Permits limits Green Diamond's right to acquire or sell or otherwise transfer interests in lands in and around the Eleven HPAs or elsewhere. However, unless commercial timberland acreage that Green Diamond acquires is included in the Plan Area by operation of this Agreement or is added by amendment, and the Permits have taken effect with regard to Covered Activities carried out on such lands in the manner provided below, Green Diamond's activities that take place on those lands shall not be covered by the Permits.

11.2 Additions to the Plan Area by Acquisition. Green Diamond may elect to add to the Plan Area additional commercial timberlands consisting of fee lands and harvesting rights that it acquires within the Eligible Plan Area pursuant to this subparagraph, provided however, that the Plan Area shall not expand by more than 15 percent of the acreage of the Initial Plan

Area without an amendment to the Plan or Permits. Areas subject to harvesting rights acquired and added to the Plan Area pursuant to this subparagraph after the Effective Date will count toward this 15 percent limit.

If Green Diamond elects to add commercial timberlands to the Plan Area pursuant to this subparagraph, Green Diamond shall submit to the Services a description of the lands it intends to add, along with a summary of relevant characteristics they share with existing Plan Area lands within that HPA. Characteristics found relevant to planning and implementation of the Plan for each HPA are described in Plan Section [4.4] and may include geology and geomorphology, climate, vegetation, habitat conditions (including water temperature, channel and habitat type, large woody debris inventory, and estuarine conditions), salmonid population estimates and Covered Species occurrence and status.

Based upon the analysis of the HPAs provided in the Plan, it is presumed that all commercial timberlands within each HPA in the Eligible Plan Area share similar relevant characteristics and, therefore, that adding such lands to the Plan Area during the term of the Permits will not likely result in adverse effects on the Covered Species different from those analyzed in connection with the original Plan. Unless the Services object in writing to Green Diamond within 60 days of receipt of the submission described herein, the subject lands shall be included in the Plan Area subject to the 15 percent limit on additional lands provided above. The Services may object to a Green Diamond election by providing a written statement with specific reasons why the Services believe the presumption described herein is incorrect. In that case, the Services and Green Diamond shall confer in good faith and pursue the dispute resolution mechanisms set forth in Paragraph 13.6 in an effort to reach an agreement. Until concurrence is reached, such lands will not become part of the Plan Area except pursuant to the amendment process set forth in Paragraph 12.

11.3 Deletions from the Plan Area by Sale or Transfer and Other Deletion.

Subject to the reporting requirements set forth in Paragraph 8.2 and this Paragraph, the Plan Area shall contract automatically, i.e., without an amendment to the Plan or Permits, to reflect each sale or other transfer, including transfers of perpetual harvesting rights, provided, however, that the acreage of the Plan Area shall not contract by more than 15 percent of the total acreage of the Initial Plan Area pursuant to sales or transfers without a Plan amendment pursuant to Paragraph 12. None of the following shall count toward the 15 percent limit on deletions from the total acreage of the Initial Plan Area or require a Plan or Permit amendment pursuant to Paragraph 12:

(a) Transfers to an agency of the federal government, including transfers involving third parties in which the ultimate owner of the property will be an agency of the federal government, where, prior to transfer, the Services have determined that the transfer shall not compromise the effectiveness of the Plan based on adequate commitments by that agency regarding management of such land;

(b) Transfers to a non-federal entity that has entered into an agreement acceptable to the Services (e.g., Green Diamond's grant of a conservation easement to be held by the state fish and wildlife agency with the Services as third-party beneficiaries) or has another

legally binding commitment (e.g., by legislative mandate) acceptable to the Services to ensure that the lands shall be managed in such a manner and for such duration so as not to compromise the effectiveness of the Plan; or

(c) Transfers to a non-federal entity that, prior to completion of the land transaction, has agreed to be bound by the Plan as it applies to the transferred land and has obtained an incidental take permit following normal permit procedures covering all species then covered by the Permits.

In addition, transfers of unexpired short-term harvesting rights and expirations of short-term harvesting rights will not apply toward the 15 percent limit. Except as provided herein and subject to Paragraph 11.1, all other sales or transfers of acreage from the Plan Area shall require an amendment to the Plan pursuant to Paragraph 12.

11.4 Effective Date of Permits for Covered Activities on Land Acquired after the Effective Date of this Agreement. The Permits, the Plan and this Agreement shall be effective for Covered Activities on all lands that meet the definition of Plan Area upon their inclusion pursuant to Paragraph 11. The Permits, the Plan and this Agreement shall be effective for Covered Activities on lands that are added to the Plan Area pursuant to amendment under Paragraph 12 upon the effective date of the amendment.

11.5 Cessation of Effectiveness of Permits as to Sold, Transferred or Deleted Lands. The Permits, the Plan and this Agreement shall cease to be effective as to Green Diamond for lands removed from the Plan Area in accordance with Paragraph 11 upon Green Diamond's sale, transfer or other deletion, provided that Green Diamond shall notify the Services in accordance with Paragraph 8.2 and shall maintain and make available to the Services upon request a record of each such transaction or deletion.

12.0 MODIFICATIONS AND AMENDMENTS

12.1 Minor Modifications.

12.1.1 Procedures. Any Party may propose minor modifications to the Plan, the Permits or this Agreement ("Minor Modifications") by providing written notice to all other Parties. Such notice shall include a statement of the reason for the proposed modification and an analysis of its environmental effects, including its effects on operations under the Plan and on Covered Species. The Parties shall use reasonable efforts to respond to proposed modifications within 60 days of receipt of such notice. Proposed minor modifications shall become effective, and the Plan shall be deemed modified accordingly, immediately upon all other Parties' written approval. Among other reasons, a receiving Party may object to a proposed minor modification based on a reasonable belief that such modification would result in operations, burdens or obligations under the Plan that are significantly different from those analyzed in connection with the original Plan; adverse effects on the environment that are new or significantly different from those analyzed in connection with the original Plan; or additional take not analyzed in connection with the original Plan. An objecting Party shall provide all other Parties with written notice of

the objection that includes a statement of the reason for the objection. If a Party objects, the proposal is not approved as a minor modification but may be processed as an amendment of the Permits in accordance with Paragraph 12.2.

12.1.2 Examples. Minor modifications to the Plan, Permits and this Agreement processed pursuant to this subparagraph include, but are not limited to, the following:

- (a) Corrections of typographic, grammatical, and similar editing errors that do not change the intended meaning;
- (b) Correction of any maps or exhibits to correct errors in mapping or to reflect previously approved changes in the Permits or the Plan;
- (c) Minor changes to survey, monitoring or reporting protocols;
- (d) Clarifications to vague or undefined language or phrases; and
- (e) Changes to operational prescriptions pursuant to, and within the foreseen range of changes resulting from, adaptive management.

12.1.3 Recordkeeping. All Parties shall maintain a file of Minor Modifications to the Plan that have been approved by all Parties until Green Diamond incorporates these changes, and any others, into a revised, comprehensive document as set forth in Paragraph 8.6 of this Agreement.

12.1.4 Other Modifications. Any modifications to the Plan or this Agreement other than those accomplished pursuant to Paragraph 11 or Paragraph 12.1 shall be processed as an amendment of the Plan, Permits and Agreement in accordance with Paragraph 12.2.

12.2 Amendment of the Plan, Permits and Agreement. The Plan, Permits and Agreement may be amended in accordance with all applicable legal requirements, including but not limited to the ESA, NEPA, and the applicable Service's regulations. The Party proposing the amendment shall provide a statement of the reasons for the amendment and an analysis of its environmental effects, including its effects on operations under the Plan and on Covered Species.

13.0 REMEDIES, ENFORCEMENT, PENALTIES AND DISPUTE RESOLUTION

13.1 In General. Except as set forth below, each Party shall have all remedies otherwise available to enforce the terms of this Agreement, the Permits, and the Operating Conservation Program.

13.2 No Monetary Damages. Except as provided in Paragraph 13.5, no Party shall be liable in damages to any other Party for any breach of this Agreement, any performance or failure to perform a mandatory or discretionary obligation imposed by this Agreement or any other cause of action arising from this Agreement.

13.3 Injunctive and Temporary Relief. The Parties acknowledge that the Covered Species are unique and that their loss as species would result in irreparable damage to the environment, and that therefore injunctive and temporary relief may be appropriate to ensure compliance with the terms of this Agreement.

13.4 Enforcement Authority of the United States. Nothing contained in this Agreement is intended to limit the authority of the United States government to seek civil or criminal penalties or otherwise fulfill its enforcement responsibilities under the ESA or other applicable law.

13.5 Stipulated Penalty for Timber Harvest or Transfer of Lands in Violation of Post-Relinquishment or Post-Revocation Commitments. If, after relinquishment pursuant to Paragraph 6.3, Green Diamond violates subparagraphs 6.3.1 (b) or (c) Green Diamond will pay a fine equal to the value of the timber harvested in addition to a fine of \$2500 per violation set forth above. The value of the timber harvested shall be determined based on the cumulative value of individual trees which have been harvested. The value of individual trees shall be determined based on the California State Board of Equalization Harvest Values Schedule. Should the California State Board of Equalization discontinue publishing the Harvest Values Schedule, an alternative method of determining harvest value shall be identified by NMFS, in cooperation with Green Diamond.

13.6 Dispute Resolution. The Parties recognize that good faith disputes concerning implementation of, or compliance with, or suspension, revocation or termination of this Agreement, the Plan or the Permits may arise from time to time. The Parties agree to work together in good faith to resolve such disputes, using the dispute resolution procedures set forth in this Paragraph or such other procedures upon which the Parties may later agree. However, if at any time any Party determines that circumstances so warrant, it may seek any available remedy without waiting to complete dispute resolution. Unless the Parties agree upon another dispute resolution process, such as that set forth in Plan Section 6.2.7.5, or unless an aggrieved Party has initiated administrative proceedings or suit in federal court as provided in this Paragraph, the Parties may use the following process to attempt to resolve disputes:

(a) Where the dispute is regarding a Party's compliance with the Operating Conservation Program, the Permits or this Agreement, the aggrieved Party shall notify the other Parties of the provision that may have been violated, the basis for contending that a violation has occurred, and the remedies it proposes to correct the alleged violation. Where the dispute is over the proper implementation of the Operating Conservation Program, the Permits or this Agreement the aggrieved Party shall notify the other Parties of the provision over which the issue arises, the basis for contending that implementation is not proper and the changes it proposes to resolve the dispute.

(b) The Party receiving the notice provided in (a) shall have 30 days, or such other time as may be agreed, to respond. During this time it may seek clarification of the information provided in the initial notice. The aggrieved Party shall use its best efforts to provide any information then available to it that may be responsive to such inquiries.

(c) Within 30 days after such response was provided or was due, representatives of the Parties having authority to resolve the dispute shall meet and negotiate in good faith toward a solution satisfactory to all Parties, or shall establish a specific process and timetable to seek such a solution.

(d) If any issues are not resolved through such a process, the Parties shall consider non-binding mediation and other alternative dispute resolution processes and, if a dispute resolution process is agreed upon, shall make good faith efforts to resolve all remaining issues through that process.

14.0 MISCELLANEOUS PROVISIONS

14.1 No Partnership. Neither this Agreement nor the Plan shall make or be deemed to make any Party to this Agreement the agent for or the partner of any other Party.

14.2 Notices. Any notice permitted or required by this Agreement shall be in writing, delivered personally to the persons listed below, or shall be deemed given five (5) days after deposit in the United States mail, certified and postage prepaid, return receipt requested and addressed as follows, or at such other address as any Party may from time to time specify to the other Parties in writing. Notices may be delivered by facsimile or other electronic means, provided that they are also delivered personally or by certified mail. Notices shall be transmitted so that they are received within the specified deadlines.

14.3 Entire Agreement. This Agreement, together with the Operating Conservation Program and the Permits, constitutes the entire agreement among the Parties. It supersedes any and all other agreements, either oral or in writing, among the Parties with respect to the subject matter hereof and contains all of the covenants and agreements among them with respect to said matters, and each Party acknowledges that no representation, inducement, promise or agreement, oral or otherwise, has been made by any other Party or anyone acting on behalf of any other Party that is not embodied herein.

14.4 Elected Officials not to Benefit. No member of or delegate to Congress shall be entitled to any share or part of this Agreement, or to any benefit that may arise from it.

14.5 Availability of Funds. Implementation of this Agreement and the Plan by the Services is subject to the requirements of the Anti-Deficiency Act and the availability of appropriated funds. Nothing in this Agreement shall be construed by the Parties to require the obligation, appropriation or expenditure of any money from the U.S. Treasury. The Parties acknowledge that the Services shall not be required under this Agreement to expend any federal agency's appropriated funds unless and until an authorized official of that agency affirmatively acts to commit to such expenditures as evidenced in writing.

14.6 Duplicate Originals. This Agreement may be executed in any number of duplicate originals. A complete original of this Agreement shall be maintained in the official records of each of the Parties hereto.

14.7 No Third Party Beneficiaries. Without limiting the applicability of rights granted to the public pursuant to the ESA or other federal law, this Agreement shall not create any right or interest in the public, or any member thereof, as a third-party beneficiary hereof, nor shall it authorize anyone not a Party to this Agreement to maintain a suit for personal injuries or damages pursuant to the provisions of this Agreement. The duties, obligations, and responsibilities of the Parties to this Agreement with respect to third parties shall remain as imposed under existing law.

14.8 Relationship to the ESA and Other Authorities. The terms of this Agreement shall be governed by and construed in accordance with the ESA and applicable federal law. In particular, nothing in this Agreement is intended to limit the authority of the Services to seek

civil or criminal penalties or otherwise fulfill their responsibilities under the ESA. Moreover, nothing in this Agreement is intended to limit or diminish the legal obligations and responsibilities of the Services as agencies of the federal government. Nothing in this Agreement shall limit the right or obligation of any federal agency to engage in consultation required under Section 7 of the ESA or other federal law; however, it is intended that the rights and obligations of Green Diamond under the Plan and this Agreement shall be considered in any consultation concerning Green Diamond's use of the Plan Area.

14.9 References to Regulations. Except as provided herein to the contrary, any reference in this Agreement, the Plan or the Permits to any regulation or rule of the Services shall be deemed to be a reference to such regulation or rule in existence at the time an action is taken.

14.10 Applicable Laws. All activities undertaken pursuant to this Agreement, the Plan or the Permits must be in compliance with all applicable state and federal laws and regulations.

14.11 Successors and Assigns. This Agreement and each of its covenants and conditions shall be binding on and shall inure to the benefit of the Parties and their respective successors and assigns. Assignment or other transfer of the Permits shall be governed by the Services' regulations under the regulations in force at the time.

14.12 Severability. If any provision of this Agreement or the Plan is found invalid or unenforceable, such provision shall be enforced to the maximum extent possible and the other provisions shall remain in effect to the extent they can be reasonably applied in the absence of such invalid or unenforceable provisions.

IN WITNESS WHEREOF, THE PARTIES HERETO have executed this Agreement to be in effect as of the Effective Date.
