<b>Exempt Fisheries</b>											
Tropical rock lobster	hand collection	405	not applicable	not applicable	December 1 to September 30; Commonwealth Fishery: Within boundary of the Torres Strait Protected Zone (TSPZ) and just south of the TSPZ	none documented	none documented	A/G		Australia Provided: Attachment A, Commonwealth Fisheries	comprehensive national legislation that requires reporting of all cetacean interactions.

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
blacklip abalone	hand collection	50	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	none documented	none documented		Code of Practice for the Abalone Fishery for protected species interactions	Australia Provided: Attachment C, New South Wales Fisheries	mandatory reporting of protected species interactions
abalone	hand collection	66	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented			Australia Provided: Attachment D, South Australian Fisheries	Western, Central, and Southern Zones, annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
seaweed/marine algae	winch (beach-based)	1	not applicable	not applicable	South Australia Fishery: beaches from Cape Jaffa and approx. 8km SE of Beachport, excluding exclusion zones year-round with spatial and temporal closures for specific species and gear types; South Australia Fishery: Lagoons and coastal marine waters	none documented	none documented			Australia Provided: Attachment D, South Australian Fisheries	land-based operation pulling in marine algae from the beach, annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
pipi	cockle rake	109	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented	C/O, A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually, MSC Certified (re-certified 2016)
crustaceans (blue swimmer crab, sand crab, velvet crab)	rake	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented	A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
molluscs (southern calamari, cockle, cuttlefish, mussel, octopus, oyster, scallop, Gould's squid)	jig	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented	A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
molluscs (southern calamari, cockle, cuttlefish, mussel, octopus, oyster, scallop, Gould's squid)	rake	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented	A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
turbo, sea urchin, scallops	hand collection	10	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented	A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
sea cucumber	hand collection	2	not applicable	not applicable	year-round; Northern Territory Fishery: to 3nm from the coast	none documented	none documented	A/G	Trepanng Fishery Code of Practice	Australia Provided: Attachment E, Northern Territory Fisheries	NT maintains a list of 24 marine mammals found in its waters ( <a href="https://denr.nt.gov.au/land-resource-management/northern-territory-species-checklist/frogs-reptiles-birds-and-mammals-checklist">https://denr.nt.gov.au/land-resource-management/northern-territory-species-checklist/frogs-reptiles-birds-and-mammals-checklist</a> )
demersal fishes, predominantly tropical snappers	handlines	8	not applicable	not applicable	year-round; Northern Territory Fishery: to 15nm from the coast	none documented	none documented	A/G		Australia Provided: Attachment E, Northern Territory Fisheries	logbooks are required, logbooks are required documenting marine mammal interactions
Timor Reef demersal fishes, predominantly tropical snappers	handline	8	not applicable	not applicable	year-round; Northern Territory Fishery: 160km northwest of Darwin	none documented	none documented	A/G		Australia Provided: Attachment E, Northern Territory Fisheries	logbooks are required, logbooks are required documenting marine mammal interactions
Spanish mackerel	handline, trolling	11	not applicable	not applicable	year-round; Northern Territory Fishery: to the outer limit of the Australian Fishing Zone	none documented	none documented	A/G	Code of Practice and Environmental Management System	Australia Provided: Attachment E, Northern Territory Fisheries	
abalone	hand collection	26	not applicable	not applicable	year-round; Western Australian Fishery: WA state waters	none documented	none documented	A/G		Australia Provided: Attachment F, Western Australian Fisheries	required reporting of marine mammal interactions
pink snapper, goldband snapper, and other demersal species	line (handline, dropline, troll)	25	not applicable	not applicable	year-round; Western Australian Fishery: Indian Ocean between 23 degrees 7 min 30 sec S and 26 degrees 30 min S from March to September but can be year-round;	whale unspecified	1 released alive	P, A/G		Australia Provided: Attachment F, Western Australian Fisheries	1 mammal interaction over the 10 years of the fishery, some regions are closed to fishing in this area
pearl oyster	hand collection	6	not applicable	not applicable	Western Australian Fishery: 4 zones extending from Exmouth to WA/NT border, most fishing occurs in zone 2	none documented	none documented	A/G		Australia Provided: Attachment F, Western Australian Fisheries	

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
shells	hand collection, ROVs	16	not applicable	not applicable	year-round; Western Australian Fishery: state-wide	none documented	none documented	A/G		Australia Provided: Attachment F, Western Australian Fisheries	this fishery utilizes closed areas for fish habitat and reef protection
coral	aquaculture	2	none provided	not applicable	year-round; Western Australian Fishery: North West of Foale Island, Southern Group, Houtman Abrolhos Islands, south Gun Island, and onshore jetty site at Basille Island	none documented	none documented	N/I	Marine Fauna Interaction Management Plan	Australia Provided: Attachment F, Western Australian Fisheries	
Gould's squid	jig	8 (automatic jigs), 4 (hand-held jigs)	not applicable	not applicable	year-round; Tasmanian Fishery: Tasmanian coastal waters	none documented	none documented	A/G		Australia Provided: Attachment G, Tasmanian Fisheries	
abalone	hand collection	140	not applicable	not applicable	year-round; Tasmanian Fishery: Tasmanian state waters	none documented	none documented	A/G	voluntary code of practice for industry and environment best practices	Australia Provided: Attachment G, Tasmanian Fisheries	
abalone molluscs (southern calamari, cockle, cuttlefish, mussel, octopus, oyster, scallop, Gould's squid)	hand collection	71 licenses	not applicable	not applicable	year-round; Victorian Fishery: Victorian coastal waters	none documented	none documented	A/G		Australia Provided: Attachment H, Victorian Fisheries	hand collection by divers, closed areas where fishing is not permitted
scallop	dredge	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm June-December; Tasmanian Fishery: Tasmanian waters	none documented	none documented	C/O, A/G		Australia Provided: Attachment D, South Australian Fisheries	mandatory reporting of marine mammal interactions however due to design of the gear and nature of operations no incidents have been recorded or are likely to occur
yellowtail kingfish	scallop dredge	6	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	none documented	none documented	C/O, A/G	Marine Fauna Interaction Management Plan	Australia Provided: Attachment G, Tasmanian Fisheries	
yellowtail kingfish	aquaculture (sea pens)	1	none provided	not applicable	year-round; New South Wales Fishery: ocean waters	none documented	none documented	N/I	Marine Fauna Interaction Management Plan	Australia Provided: Attachment C, New South Wales Fisheries	marine fauna interaction management plan in place
mussels	aquaculture (lines)	1	none provided	not applicable	year-round; South Australia Fishery: Port Lincoln, coastal bays around SA - Coffin Bay, Streaky Bay, Smoky Bay, Ceduna, Cowell, Kangaroo island, Yorke Peninsula	none documented	none documented	N/I	Marine Fauna Interaction Management Plan	Australia Provided: Attachment C, New South Wales Fisheries	marine fauna interaction management plan in place
oysters, mussels, abalone	aquaculture (lines, baskets, benthic structures, cages)	335 (oysters), 36 (mussels), 10 (abalone)	none provided	not applicable	year-round; western Australian Fishery: Kimberley Aquaculture Development Zone (N. King Sound)	none documented	none documented	N/I	Aquaculture Regulations 2016 to minimize interactions	Australia Provided: Attachment D, South Australian Fisheries	required under Aquaculture Regulations 2016 to have an approved strategy to minimize interactions with seabirds and marine mammals. The strategy must be approved by the minister
barramundi	aquaculture (cages)	1	MPA Fish Farms Pty Ltd	not applicable	year-round; Commonwealth Fishery: Cape York to south Australian/Victorian border, Australia EEZ and high seas	none documented	none documented	N/I	Kimberley Zone Environmental Monitoring and Management Plan	Australia Provided: Attachment F, Western Australian Fisheries	measures regulating net maintenance and feeding schedules to reduce waste as an attractant
tuna and billfish (bigeye, yellowfin, swordfish, marlin) dolphinfish	minor line (handline, trolling, rod and reel)	1	not applicable	not applicable	year-round; Commonwealth Fishery: Cape York to south Australian/Victorian border, Australia EEZ and high seas	none documented	none documented	A/G		Australia Provided: Attachment A, Commonwealth Fisheries	western tuna and billfish fishery, Australia lumped longline and minor line fisheries together however, interactions by minor line fishermen likely to be minimal
<b>Export Fisheries</b>											
icefish	trawl, midwater	1			Subarea 58.4.2 (Heard Is.)	none documented	none documented	C/O, A/G	CCAMLR	Baker et al, 2014; See Non-tuna RFMO_FINAL for citations, details	not currently active, Party to CCAMLR; SPRFMO; CPFLDSP

toothfish	longline	1			Subarea 88.2 July 1 to June 30; Commonwealth Fishery: Within boundary of the Torres Strait Protected Zone (TSPZ) and just south of the TSPZ boundary to Cape (banana prawn) and 1 August to 30 November (tiger and endeavor prawn); Commonwealth Fishery: Gulf of Carpentaria (Cape York) and west to Cape Londonderry on the western side of the Joseph Bonaparte Gulf December; Commonwealth Fishery: Eastern part of the Torres Strait, within boundary of the Torres Strait Protected Zone (TSPZ)	none documented	none documented	C/O, A/G	CCAMLR	U.S. trade data	active
mud crab (Scylla spp)	pots	102	not applicable	not applicable	Commonwealth Fishery: Within boundary of the Torres Strait Protected Zone (TSPZ) and just south of the TSPZ boundary to Cape (banana prawn) and 1 August to 30 November (tiger and endeavor prawn); Commonwealth Fishery: Gulf of Carpentaria (Cape York) and west to Cape Londonderry on the western side of the Joseph Bonaparte Gulf December; Commonwealth Fishery: Eastern part of the Torres Strait, within boundary of the Torres Strait Protected Zone (TSPZ)	none provided	none provided	C/O, A/G		Australia Provided: Attachment A, Commonwealth Fisheries	suspect interactions causing harm or death likely to be zero
banana prawn, tiger prawn, endeavor prawn	bottom (prawn) trawl	52	not applicable	not applicable	Commonwealth Fishery: Eastern part of the Torres Strait, within boundary of the Torres Strait Protected Zone (TSPZ)	dolphins unspecified, bottlenose dolphin, common dolphins	5 interactions with 2 mortalities (2012-16), 2, 3	P, A/G		Australia Provided: Attachment A, Commonwealth Fisheries, MSRA Database: SC66a Report_Appendix L_Small Cetaceans, IWC 2012, IWC 2015	
banana prawn, tiger prawn, endeavor prawn	bottom (prawn) trawl	60	not applicable	not applicable	Commonwealth Fishery: Eastern part of the Torres Strait, within boundary of the Torres Strait Protected Zone (TSPZ)	dolphins unspecified	1 interaction, released alive (2012-16)	P, A/G		Australia Provided: Attachment A, Commonwealth Fisheries	
tuna and billfish (southern bluefin, albacore, bigeye, yellowfin, swordfish, marlin)	longline	37	not applicable	not applicable	year-round; Commonwealth Fishery: Cape York to south Australian/Victorian border, Australia EEZ and high seas	common dolphin, dolphin unspecified, New Zealand fur seal, Australian fur seal, seals unspecified, baleen whale unspecified, melon-headed whale, short-finned pilot whale, long-finned pilot whale, toothed whales unspecified, whales unspecified	26 interactions (2013-16), 1 dead (NZ fur seal), rest released alive	P, A/G	IOTC	Australia Provided: Attachment A, Commonwealth Fisheries, MSRA Database: IWC 2015, IOTC	eastern tuna and billfish fishery, e-monitoring required on all vessels, mandatory bycatch and interaction reporting in logbooks

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
scampi (Australian, Boschma's, velvet)	trawl, bottom	max 7	not applicable	not applicable	year-round; Commonwealth Fishery: 144 degrees E to 125 E off Western Australian coast between 200m isobaths to the outer limit of the Aus. Fishing Zone	none provided	none provided	A/G		Australia Provided: Attachment A, Commonwealth Fisheries	observers present on vessels (not all trips are observed), Australia listed mm interactions as "not applicable," mandatory logbook reporting
orange roughy, ruby snapper, and other finfish	trawl	max 11	not applicable	not applicable	year-round; Commonwealth Fishery: deepwater off Western Australia between 200m isobath to the outer limit of the Aus. Fishing Zone	none provided	none provided	A/G		Australia Provided: Attachment A, Commonwealth Fisheries, finfish trawl (50mm mesh size restriction) Australia Provided: Attachment A, Commonwealth Fisheries, MSRA Database: IWC 2010 and <a href="http://www.abc.net.au/news/2015-10-11/protect-threatened-species-killed-as-bycatch-in-australian-water/6844002">http://www.abc.net.au/news/2015-10-11/protect-threatened-species-killed-as-bycatch-in-australian-water/6844002</a>	observers present on vessels (not all trips are observed), Australia listed mm interactions as "not applicable," mandatory logbook reporting
southern bluefin tuna	purse seine	27 domestic, 6 farm	not applicable	not applicable	Commonwealth Fishery: Australia EEZ	seals unspecified in the area and may interact, common dolphins, fur seals and unidentified dolphins	none documented (2011-15), 1 common dolphin, 12 fur seals, 9 unspecified dolphins	P, A/G			year-round, no observed fatalities or injuries associated with this fishery, required reporting of protected species interactions, Geelong Star responsible for 12 fur seals and 9 unidentified dolphins
tuna and billfish (bigeye, yellowfin, swordfish, marlin)	longline	2	not applicable	not applicable	year-round; Commonwealth Fishery: Cape York to south Australian/Victorian border, Australia EEZ and high seas Commonwealth Fishery: Cape York to south Australian/Victorian border, Australia EEZ and high seas	seals unspecified, short-finned pilot whale, melon-headed whale, baleen whale, common dolphin, Indo-Pacific bottlenose dolphin	4 interactions, no mortalities (2016), cetaceans: 14, 2, 6, 3	P, A/G	WCPFC	Australia Provided: Attachment A, Commonwealth Fisheries, MSRA Database: WCPFC, IWC 2015	western tuna and billfish fishery, e-monitoring required on all vessels, mandatory bycatch and interaction reporting in logbooks
skipjack tuna	purse seine	none provided	not applicable	not applicable	year-round; Commonwealth Fishery: Australia EEZ around Macquarie Island	none provided	none provided	A/G	WCPFC	WCPFC Annual Report to the Commission, Information on Fisheries, Research, and Statistics	may not be active
toothfish	longline, trawl	1	not applicable	not applicable	year-round; Commonwealth Fishery: Coral Sea Fishery: Cape York to Sandy Cape	Antarctic fur seal	1 (2014)	P, A/G		Australia Provided: Attachment A, Commonwealth Fisheries	follows CCAMLR CMs for observer coverage though falls outside of the Convention Area, mandatory reporting of protected species interactions, 2 observers on board the vessel at all times
rock lobster and sea snail	trap/pot	2	not applicable	not applicable	year-round; Commonwealth Fishery: southern WA, all of SA, Victoria, Tasmania, and New South Wales from 3nm to the edge of the Australian Fishing Zone, and Southern Queensland	none provided	none provided	C/O, A/G		Australia Provided: Attachment A, Commonwealth Fisheries	
small pelagics (sardine, blue mackerel)	purse seine	2	not applicable	not applicable	year-round; Commonwealth Fishery: southern WA, all of SA, Victoria, Tasmania, and New South Wales from 3nm to the edge of the Australian Fishing Zone, and Southern Queensland	none documented	none documented	C/O, A/G		Australia Provided: Attachment A, Commonwealth Fisheries	CA anchovy, mackerel, sardine purse seine is Category III
small pelagics (blue mackerel, jack mackerel, rebait (rover))	trawl, midwater	1	not applicable	not applicable	year-round; Commonwealth Fishery: Great Australian Bight, shelf water, SA to Cape Leeuwin	Australian fur seal, New Zealand fur seal, seals unspecified, common dolphin	dead: 48, 8, 12, 9 (6 fur seals interacted but released alive) (2015-16)	P, A/G	dolphin strategy currently in development	Australia Provided: Attachment A, Commonwealth Fisheries	e-monitoring required, cannot fish in closed areas for Coorong dolphin, and closures outlined in sea lion management strategy, dolphin strategy currently being developed
deepwater flathead, bight redfish	trawl	3	not applicable	not applicable	year-round; Commonwealth Fishery: Great Australian Bight, continental slope water, SA to Cape Leeuwin	New Zealand fur seal	2 released alive (2014-15)	P, A/G		Australia Provided: Attachment A, Commonwealth Fisheries Australia Provided: Attachment A, Commonwealth Fisheries, MSRA Database: paper: "Multiple management units of short-beaked common dolphins subject to fisheries bycatch off southern and southeastern Australia"	closed areas are in operation in these fisheries, fishermen are required to report any interaction with protected species
Blue grenadier, western germfish, pink ling	trawl	3	not applicable	not applicable	year-round; Commonwealth Fishery: Great Australian Bight, continental slope water, SA to Cape Leeuwin	New Zealand fur seal, Australian fur seal, common dolphin	3 released alive (2014-15), ~10, 9	P, A/G			closed areas are in operation in these fisheries, fishermen are required to report any interaction with protected species

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
deepwater flathead	Danish seine	1	not applicable	not applicable	Commonwealth Fishery: Great Australian Bight, shelf water, SA to Cape Leeuwin	New Zealand fur seal	4 released alive (2014-15)	P		Australia Provided: Attachment A, Commonwealth Fisheries	closed areas are in operation in these fisheries, fishermen are required to report any interaction with protected species
blue-eye trevalla, blue grenadier, blue warehou, deepwater sharks, eastern school whiting, flathead, gemfish, gulper shark, jackass morwong, john dory, mirror dory, ocean jacket, ocean perch, orange roughy, oreo dories, pink ling, redfish, ribaldo, royal red prawn, silver treevally, and silver warehou	trawl, demersal otter (sometimes also pair trawling and midwater trawling)	38	not applicable	not applicable	year-round; Commonwealth Fishery: east of Sydney, southward through the Bass Strait and around Tasmania to Cape Jervis in SA	Australian fur seal, Antarctic fur seal, New Zealand fur seal, seals unspecified, common dolphin, dolphins unspecified, bottlenose dolphin	Australian fur seal: 345 dead, 110 alive, Antarctic fur seal: 4 dead, 1 alive, New Zealand fur seal: 7 dead, 3 alive, seals unspecified: 230 dead, 44 alive, common dolphin: 9 dead, dolphins unspecified: 4 dead, 1 alive, bottlenose dolphin: 2	P, A/G		Australia Provided: Attachment A, Commonwealth Fisheries, MSRA Database: SC66a Report_Appendix L_Small Cetaceans, IWC 2012, IWC 2015	fishermen required to take reasonable steps to avoid interaction with protected species, and report interactions in logbooks
blue-eye trevalla, blue grenadier, blue warehou, deepwater sharks, eastern school whiting, flathead, gemfish, gulper shark, jackass morwong, john dory, mirror dory, ocean jacket, ocean perch, orange roughy, oreo dories, pink ling, redfish, ribaldo, royal red prawn, silver treevally, and silver warehou	Danish seine	16	not applicable	not applicable	year-round; Commonwealth Fishery: east of Sydney, southward through the Bass Strait and around Tasmania to Cape Jervis in SA	Australian fur seal, New Zealand fur seal, seals unspecified	Australian fur seal: 4 dead, 7 alive, New Zealand fur seal: 2 alive, seals unspecified: 24 dead, 20 alive	P, A/G		Australia Provided: Attachment A, Commonwealth Fisheries	fishermen required to take reasonable steps to avoid interaction with protected species, and report interactions in logbooks
alfonsino, blue-eye trevalla, and boarfish	deepwater trawl	0 active 2016	not applicable	not applicable	year-round; Commonwealth Fishery: 200nm around Lord Howe Island off New South Wales	none documented	none documented	C/O, A/G		Australia Provided: Attachment A, Commonwealth Fisheries	concerns with bottom habitat destruction, closed areas to protect orange roughy stocks
gummy shark	shark hook	24	not applicable	not applicable	year-round; Commonwealth Fishery: waters off New South Wales/Victoria west to the SA/WA border, including waters around Tasmania to the extent of the Australian Fishing Zone.	Australian fur seal, New Zealand fur seal, seals unspecified, sea lions unspecified, killer whales	Australian fur seal: 1 alive, New Zealand fur seal: 4 dead, 1 alive, seals unspecified: 3 alive, sea lions unspecified: 2 alive, killer whales: 1 dead (2012-2016)	P, A/G		Australia Provided: Attachment A, Commonwealth Fisheries	e-monitoring required, cannot fish in closed areas for Coorong dolphin, and closures outlined in sea lion management strategy, dolphin strategy for gillnet allows vessels to fish in Coorong Dolphin Zone provided the vessel is able to stay below a set bycatch rate, required reporting on interactions
blue-eye trevalla, pink ling	scalefish hook	16	not applicable	not applicable	year-round; Commonwealth Fishery: waters off SA, Victoria, and Tasmania 3nm to the extent of the Australian Fishing Zone, also waters off Queensland and New South Wales	Australian fur seal, New Zealand fur seal, seals unspecified, sea lions unspecified, killer whales	Australian fur seal: 1 alive, New Zealand fur seal: 4 dead, 1 alive, seals unspecified: 3 alive, sea lions unspecified: 2 alive, killer whales: 1 dead (2012-2016)	P, A/G		Australia Provided: Attachment A, Commonwealth Fisheries	e-monitoring required, cannot fish in closed areas for Coorong dolphin, and closures outlined in sea lion management strategy for gillnet allows vessels to fish in Coorong Dolphin Zone provided the vessel is able to stay below a set bycatch rate, required reporting on interactions
elephantfish, gummy shark, sawshark	gillnet	37	not applicable	not applicable	year-round; Commonwealth Fishery: waters off New South Wales/Victoria west to the SA/WA border, including waters around Tasmania to the extent of the Australian Fishing Zone.	Australian fur seal, New Zealand fur seal, seals unspecified, Australian sea lion, sea lions unspecified, common dolphin, bottlenose dolphin, dolphins unspecified, Indo-Pacific bottlenose dolphin	Australian fur seal: 24 dead, 4 alive, New Zealand fur seal: 14 dead, 1 alive, seals unspecified: 33 dead, 8 alive, Australian sea lion: +9 dead, 1 alive, sea lions unspecified: 2 dead, common dolphin: +28 dead, 2 alive, bottlenose dolphin: 2 dead, dolphins unspecified: 75 dead, 4 alive, 1	P, A/G	Environment Protection and Biodiversity Conservation Act, Australian Sea Lion Management Strategy, Dolphin Strategy for gillnet fishers	Australia Provided: Attachment A, Commonwealth Fisheries, MSRA Database: SC66a Report_Appendix L_Small Cetaceans, paper: "Multiple management units of short-beaked common dolphins subject to fisheries bycatch off southern and southeastern Australia", IWC 2012, 2014, 2015	e-monitoring required, cannot fish in closed areas for Coorong dolphin, and closures outlined in sea lion management strategy, dolphin strategy for gillnet allows vessels to fish in Coorong Dolphin Zone provided the vessel is able to stay below a set bycatch rate, required reporting on interactions

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
pink ling, hagfish	trap	2	not applicable	not applicable	Commonwealth Fishery: specific areas for specific trap fisheries	none provided	none provided	C/O, A/G		Australia Provided: Attachment A, Commonwealth Fisheries	e-monitoring required, cannot fish in closed areas for Coorong dolphin, and closures outlined in sea lion management strategy, dolphin strategy for gillnet allows vessels to fish in Coorong Dolphin Zone provided the vessel is able to stay below a set bycatch rate, required reporting on interactions. <b>WA, CA, OR hagfish pots are Category III</b>
prawn, scallop, lobster, squid	trawl, otter	289	not applicable	not applicable	year-round with 2 area closures; Queensland Fishery: New South Wales border to tip of Cape York east to offshore Constitutional Settlement line	inshore and common dolphins present in area	1 (unspecified sp - 2016)	P, A/G	Environment Protection and Biodiversity Conservation Act	Australia Provided: Attachment B, Queensland Fisheries	30 sp of marine mammals found in Queensland waters, mandatory reporting of protected species interactions
prawn, scallop, lobster, squid	bream trawl	50	not applicable	not applicable	year-round with 2 area closures; Queensland Fishery: New South Wales border to tip of Cape York east to offshore Constitutional Settlement line including rivers and creeks	inshore and common dolphins present in area	1 (unspecified sp - 2016)	P, A/G	Environment Protection and Biodiversity Conservation Act	Australia Provided: Attachment B, Queensland Fisheries	30 sp of marine mammals found in Queensland waters, mandatory reporting of protected species interactions
yellowfin bream, mud crab, river eels, dusky flathead, luderick, sea mullet, pipi, eastern king prawn, school prawn, sand whiting (and other spp)	traps	588	not applicable	not applicable	year-round; New South Wales Fishery: specific estuaries	none documented	none documented	C/O, A/G		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer program in effect
yellowfin bream, mud crab, river eels, dusky flathead, luderick, sea mullet, pipi, eastern king prawn, school prawn, sand whiting (and other spp)	meshing nets	588	not applicable	not applicable	year-round; New South Wales Fishery: specific estuaries	none documented	none documented	C/O, A/G		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer program in effect
yellowfin bream, mud crab, river eels, dusky flathead, luderick, sea mullet, pipi, eastern king prawn, school prawn, sand whiting (and other spp)	fish hauling nets	588	not applicable	not applicable	year-round; New South Wales Fishery: specific estuaries	none documented	none documented	C/O, A/G		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer program in effect
yellowfin bream, mud crab, river eels, dusky flathead, luderick, sea mullet, pipi, eastern king prawn, school prawn, sand whiting (and other spp)	prawn nets	588	not applicable	not applicable	year-round; New South Wales Fishery: specific estuaries	none documented	none documented	C/O, A/G		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer program in effect
Australian sardine, Australian sardine, Australian sardine, anchovy, dart, luderick, sand whiting, sea mullet, yellowfin bream, eastern sea garfish, blue mackerel, yellowtail scad, witebait, jack mackerel, silver trevally, sweep	hauling net	263	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	none documented	none documented	C/O		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer program in effect
Australian sardine, Australian sardine, Australian sardine, anchovy, dart, luderick, sand whiting, sea mullet, yellowfin bream, eastern sea garfish, blue mackerel, yellowtail scad, witebait, jack mackerel, silver trevally, sweep	garfish net	263	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	none documented	none documented	C/O		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer program in effect

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
Australian sardine, Australian sardine, Australian bonito, anchovy, dart, luderick, sand whiting, sea mullet, yellowfin bream, eastern sea garfish, blue mackerel, yellowtail scad, witebait, jack mackerel, silver trevally, sweep	pilchard, anchovy, and bait net	263	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	none documented	none documented	C/O		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer program in effect
Australian sardine, Australian bonito, anchovy, dart, luderick, sand whiting, sea mullet, yellowfin bream, eastern sea garfish, blue mackerel, yellowtail scad, witebait, jack mackerel, silver trevally, sweep	purse seine	263	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	none documented	none documented	C/O, A/G		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer program in effect
prawn (school prawn)	trawl, otter	153	not applicable	not applicable	New South Wales Fishery: Clarence River estuary	none documented	none documented	C/O, A/G		Australia Provided: Attachment C, New South Wales Fisheries	mandatory reporting of protected species interactions, observer program in effect
prawn (school prawn, eastern king prawn)	trawl, otter	153	not applicable	not applicable	year-round; New South Wales Fishery: Hunter River estuary	none documented	none documented	C/O, A/G		Australia Provided: Attachment C, New South Wales Fisheries	mandatory reporting of protected species interactions, observer program in effect
prawn (school prawn, eastern king prawn), squid (Loligo, Photololigo, Lollius, Eupyrma, Sepioloidea)	trawl, otter	153	not applicable	not applicable	year-round; New South Wales Fishery: Hawksbury River estuary	none documented	none documented	C/O, A/G		Australia Provided: Attachment C, New South Wales Fisheries	mandatory reporting of protected species interactions, observer program in effect
Australian bonito, banded (bar) rock cod, blue-eye trevally, grey (rubberlip) morwong, gummy shark, leatherjacket, silver trevally, snapper, spanner crab, yellowfin bream, yellowtail, kingfish	trap	345	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	humpback whale	1	P, A/G		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer program in effect, humpback whale swam into a line, interaction was brief and whale swam off not noticeably distressed by the encounter
Australian bonito, banded (bar) rock cod, blue-eye trevally, grey (rubberlip) morwong, gummy shark, leatherjacket, silver trevally, snapper, spanner crab, yellowfin bream, yellowtail, kingfish	crab net	345	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	none documented	none documented	C/O, A/G		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer program in effect
Australian bonito, banded (bar) rock cod, blue-eye trevally, grey (rubberlip) morwong, gummy shark, leatherjacket, silver trevally, snapper, spanner crab, yellowfin bream, yellowtail, kingfish	lines	345	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	none documented	none documented	C/O, A/G		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer program in effect
Eastern rock lobster	traps	99	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	none documented	none documented	C/O, A/G	NSW Lobster Fishery Code of Practice for protected species interactions	Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer programs have previously been in effect in this fishery
prawns (eastern king, school, royal red, Balmain bug), fish (tiger flathead, sand/bluespotted flathead, silver trevally, fiddler shark, eastern school whiting, stout whiting), octopus, cuttlefish, southern calamari	trawl, otter	205	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	New Zealand fur seal, unidentified seal	1 NZ fur seal: dead, 1 unidentified seal released alive	P, A/G		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer programs have previously been in effect in this fishery
fish (tiger flathead, sand/bluespotted flathead, silver trevally, fiddler shark, eastern school whiting, stout whiting)	Danish seine	19	not applicable	not applicable	year-round; New South Wales Fishery: ocean waters	New Zealand fur seal, unidentified seal	1 NZ fur seal: dead, 1 unidentified seal released alive	P		Australia Provided: Attachment C, New South Wales Fisheries	there are 6 marine parks and reserves where commercial fishing is restricted or prohibited, mandatory reporting of protected species interactions, observer programs have previously been in effect in this fishery
blue crab	pots	15	not applicable	not applicable	year-round; South Australia Fishery: gulf waters of SA	none documented	none documented	C/O, A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
giant crab	pots	262	not applicable	not applicable	Southern zone: 1 October to 31 May, Northern Zone: 1 November to 31 May; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented	C/O, A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
yellow-eye mullet, mullet, bony bream, black bream, greenback flounder	set nets	109	not applicable	not applicable	year-round with spatial and temporal closures for specific species and gear types; South Australia Fishery: Lagoons and coastal marine waters	none documented	none documented	C/O, A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
yellow-eye mullet, mullet, bony bream, black bream, greenback flounder	haul nets	109	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	dolphins unspecified	8	P, C/O, A/G		Australia Provided: Attachment D, South Australian Fisheries, Mackay et al. 2015 Operational Interactions with Threatened Endangered or Protected Sp	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
crustaceans (blue swimmer crab, sand crab, velvet crab)	pots/traps	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented	C/O, A/G		Australia Provided: Attachment D, South Australian Fisheries	year-round, annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
crustaceans (blue swimmer crab, sand crab, velvet crab)	nets	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented	C/O, A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
molluscs (southern calamari, cockle, cuttlefish, mussel, octopus, oyster, scallop, Gould's squid)	trap	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented	C/O, A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
molluscs (southern calamari, cockle, cuttlefish, mussel, octopus, oyster, scallop, Gould's squid)	nets	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented	C/O, A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
Scalefish (Australian anchovy, barracouta, black bream, cod, dory, flathead, flounder, southern garfish, bluespotted goatfish, Australian herring, yellowtail kingfish, leatherjacket, pink ling, blue mackerel, jack mackerel, morwong, mullet, mullet, mullet, redfish, Bight redfish, West Australian salmon, snapper, snook, southern sole, sea sweep, swallowtail, blue-eye trevalla, trevally, whiting, bluethroat wrasse)	longline	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	dolphin unspecified, common dolphin	1 (2007/08), 1	P, A/G		Australia Provided: Attachment D, South Australian Fisheries, MSRA Database: IWC 2010	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
Scalefish (Australian anchovy, barracouta, black bream, cod, dory, flathead, flounder, southern garfish, bluespotted goatfish, Australian herring, yellowtail kingfish, leatherjacket, pink ling, blue mackerel, jack mackerel, morwong, mullet, mulloway, redfish, Bight redfish, West Australian salmon, snapper, snook, southern sole, sea sweep, swallowtail, blue-eye trevalla, trevally, whiting, bluethroat wrasse)	gillnet	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	dolphin unspecified, common dolphin	1 (2007/08), 1	P, A/G		Australia Provided: Attachment D, South Australian Fisheries, MSRA Database: IWC 2010	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
barracouta, black bream, cod, dory, flathead, flounder, southern garfish, bluespotted goatfish, Australian herring, yellowtail kingfish, leatherjacket, pink ling, blue mackerel, jack mackerel, morwong, mullet, mulloway, redfish, Bight redfish, West Australian salmon, snapper, snook, southern sole, sea sweep, swallowtail, blue-eye trevalla, trevally, whiting, bluethroat wrasse)	purse seine	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	dolphin unspecified, common dolphin	1 (2007/08), 1	P, A/G		Australia Provided: Attachment D, South Australian Fisheries, MSRA Database: IWC 2010	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
Scalefish (Australian anchovy, barracouta, black bream, cod, dory, flathead, flounder, southern garfish, bluespotted goatfish, Australian herring, yellowtail kingfish, leatherjacket, pink ling, blue mackerel, jack mackerel, morwong, mullet, mulloway, redfish, Bight redfish, West Australian salmon, snapper, snook, southern sole, sea sweep, swallowtail, blue-eye trevalla, trevally, whiting, bluethroat wrasse)	other nets	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	dolphin unspecified, common dolphin	1 (2007/08), 1	P, A/G		Australia Provided: Attachment D, South Australian Fisheries, MSRA Database: IWC 2010	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually

sharks (skates, rays, and sharks of all species [except white shark])	purse seine	771	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA to 200nm	none documented	none documented	C/O, A/G		Australia Provided: Attachment D, South Australian Fisheries	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
western king prawn	prawn trawl net	52	not applicable	not applicable	Gulf St Vincent: 1 November to 25 December and 1 March to 31 July, Spencer Gulf: 1 November to 31 December and 1 March to 30 June, West Coast: year-round; South Australia Fishery: >10m depth north in Gulf St. Vincent, Investigator Strait, and Backstairs Passage, Spencer Gulf	seals unidentified	2 (2009/10), ~100 (2007-15)	P, A/G		Australia Provided: Attachment D, South Australian Fisheries, Mackay et al, 2015_Operational Interactions with Threatened Endangered or Protected Sp	annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
rock lobster	pots	261	not applicable	not applicable	Southern zone: 1 October to 31 May, Northern Zone inner region: 1 November to 31 May with option to extend full year, Northern Zone outer region: year-round; South Australia Fishery: marine waters of SA to 200nm	interaction with unidentified dolphin	1 (2007/08)	P, A/G	SLEDs required in all lobster pots used in less than 100m depth in the Northern Zone	Australia Provided: Attachment D, South Australian Fisheries, Mackay et al, 2015_Operational Interactions with Threatened Endangered or Protected Sp	sea lion excluder devices required in all lobster pots used in less than 100m depth to mitigate interaction, annual reporting of interaction with Threatened , Endangered and Protected Species (TEPS) published annually
sardine	purse seine	29	not applicable	not applicable	year-round; South Australia Fishery: marine waters of SA, predominantly southern Spencer Gulf	short-beaked common dolphin and dolphins unidentified, unidentified seals	4 (2014/15), 191 (2007-2015), 141 seal interactions (3 dead), 423 common dolphins (IWC reports)	P, A/G	Industry Code of Practice to prevent dolphin interaction	Australia Provided: Attachment D, South Australian Fisheries, Mackay et al, 2015_Operational Interactions with Threatened Endangered or Protected Sp, MSRA Database: SC66a Report_Appendix L_Small Cetaceans, paper: "Multiple management units of short-beaked common dolphins subject to fisheries bycatch off southern and southeastern Australia", IWC 2012, IWC 2015	industry code of practice to prevent dolphin interaction, onboard observer program
demersal fishes, predominantly tropical snappers	fish traps	8	not applicable	not applicable	year-round; Northern Territory Fishery: to 15nm from the coast	none documented	none documented	C/O, A/G		Australia Provided: Attachment E, Northern Territory Fisheries	logbooks are required documenting marine mammal interactions all trawls are required to have bycatch reduction devices, malfunction of a bycatch reduction device on the trawl (2014), logbooks are required documenting marine mammal interactions
demersal fishes, predominantly tropical snappers	trawl	8	not applicable	not applicable	year-round; Northern Territory Fishery: to 15nm from the coast	dolphins unspecified	2	P, A/G	Bycatch Reduction Devices	Australia Provided: Attachment E, Northern Territory Fisheries	logbooks are required documenting marine mammal interactions
Australian blacktip sharks, common blacktip shark, spottail shark, grey mackerel	longline, demersal	9	not applicable	not applicable	year-round; Northern Territory Fishery: to the outer limit of the Australian Fishing Zone	dolphin unspecified	1 (2015)	P, A/G	offshore net and fishery code of practice	Australia Provided: Attachment E, Northern Territory Fisheries	protected species fact sheets developed for dugongs
Australian blacktip sharks, common blacktip shark, spottail shark, grey mackerel	longline, pelagic	9	not applicable	not applicable	year-round; Northern Territory Fishery: to the outer limit of the Australian Fishing Zone	dolphin unspecified	1 (2015)	P, A/G	offshore net and fishery code of practice	Australia Provided: Attachment E, Northern Territory Fisheries	protected species fact sheets developed for dugongs
Australian blacktip sharks, common blacktip shark, spottail shark, grey mackerel	gillnet	9	not applicable	not applicable	year-round; Northern Territory Fishery: to the outer limit of the Australian Fishing Zone	dolphin unspecified	1 (2015)	P, A/G	offshore net and fishery code of practice	Australia Provided: Attachment E, Northern Territory Fisheries	protected species fact sheets developed for dugongs
Timor Reef demersal fishes, predominantly tropical snappers	traps	8	not applicable	not applicable	year-round; Northern Territory Fishery: 160km northwest of Darwin	none documented	none documented	C/O, A/G		Australia Provided: Attachment E, Northern Territory Fisheries	logbooks are required, logbooks are required documenting marine mammal interactions
Timor Reef demersal fishes, predominantly tropical snappers	trawl	8	not applicable	not applicable	year-round; Northern Territory Fishery: 160km northwest of Darwin	none documented	none documented	C/O, A/G		Australia Provided: Attachment E, Northern Territory Fisheries	currently a trial fishery under a research permit, bycatch reduction devices are required on all trawl nets used in the research trial

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation March/April to August; Western Australian Fishery: area off the mainland between 27 degrees S 51 min and 29 degrees S 3 min November/early December, some areas are closed to fishing; Western Australian Fishery: waters of the Exmouth Gulf south of a line that extends from the mainland to Muiron Islands, Serrurier Island and 114 degrees 46 min E	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
saucer scallop, some western king prawn	trawl, demersal otter	4	not applicable	not applicable		none documented	none documented	C/O, A/G	Bycatch Reduction Devices	Australia Provided: Attachment F, Western Australian Fisheries	license conditions are in place requiring bycatch reduction devices and grids
prawns (western king, brown tiger, endeavor, banana)	trawl, demersal otter	6	not applicable	not applicable		none documented	none documented	C/O, A/G	Bycatch Reduction Devices	Australia Provided: Attachment F, Western Australian Fisheries	license conditions are in place requiring bycatch reduction devices and grids, MSC Certified
Octopus	traps	25	not applicable	not applicable	year-round; Western Australian Fishery: Cockburn Sound, three zones extending from the mainland year-round, area closures; Western Australian Fishery: zone 2	humpback whale	2 average of 22.2 interactions each year, 0.65-1.2% bycatch rate	P, A/G	Entanglement Mitigation Measures have been Adopted	Australia Provided: Attachment F, Western Australian Fisheries, MSRA Database: IWC 2010	to mitigate gear entanglement with whales, the following mitigation measures have been adopted: OIMF: When fishing in zones 1 or 2 between 1 May and 14 November each year, the master of an authorized vessel must, where using multiple traps or cradles, all traps or cradles must be set in longline formation consisting of a minimum of 20 traps or cradles per longline; or where using single traps or cradles, ensure: there is no rope on the surface of the water, other than which
pilbara fish trawl (snapper species, rankin cod, can include cuttlefish and squid)	trawl	3	not applicable	not applicable	Australian Fishery: operates in 2 zones: west off the mainland bw 23 degrees 34 min S and 26 degrees 30 min S to approx. 150m isobath, zone 2 covers the waters of Shark Bay	dolphins unspecified, bottlenose dolphin		P, A/G	Bycatch Reduction Devices	Australia Provided: Attachment F, Western Australian Fisheries, Allen et al, 2014, Patterns of dolphin bycatch in a NW Australian trawl fishery	gear restrictions, use of bycatch reduction devices is mandatory
blue swimmer crab	trawl	27	not applicable	not applicable	Australian Fishery: operates in 2 zones: west off the mainland bw 23 degrees 34 min S and 26 degrees 30 min S to approx. 150m isobath, zone 2 covers the waters of Shark Bay	none documented	none documented	C/O, A/G	Bycatch Reduction Devices	Australia Provided: Attachment F, Western Australian Fisheries	main mammal of concern in shark bay is the dugong, spatial and temporal closures here reduce the potential for dugong interaction, trawl operators are required to use bycatch reduction devices in Shark Bay
blue swimmer crab	traps	27	not applicable	not applicable	Australian Fishery: operates in 2 zones: west off the mainland bw 23 degrees 34 min S and 26 degrees 30 min S to approx. 150m isobath, zone 2 covers the waters of Shark Bay	none documented	none documented	C/O, A/G		Australia Provided: Attachment F, Western Australian Fisheries	main mammal of concern in shark bay is the dugong, spatial and temporal closures here reduce the potential for dugong interaction, trap longlines are required to be made from negatively buoyant rope to minimize interactions
prawns (western king, brown tiger, coral, endeavor)	trawl	18	not applicable	not applicable	October/November; Western Australian Fishery: waters off the mainland between 23 degrees, 34 min S, and 26 degrees, 30 min S to approx. 200m isobath March to May, and August to February;	none documented	none documented	C/O, A/G	Bycatch Reduction Devices	Australia Provided: Attachment F, Western Australian Fisheries	several nursery areas are closed to fishing, and other fishery areas can be closed or opened during the fishing season, main mammal of concern in shark bay is the dugong, spatial and temporal closures here reduce the potential for dugong interaction, trawl operators are required to use bycatch reduction devices in Shark Bay, mandatory use of logbook reporting, MSC Certified
scallop	trawl	24	not applicable	not applicable	Western Australian Fishery: waters off the mainland between 23 degrees, 34 min S, and 26 degrees, 30 min S to	none documented	none documented	C/O, A/G	Bycatch Reduction Devices	Australia Provided: Attachment F, Western Australian Fisheries	several nursery areas are closed to fishing, and other fishery areas can be closed or opened during the fishing season, main mammal of concern in shark bay is the dugong, spatial and temporal closures here reduce the potential for dugong interaction, trawl operators are required to use bycatch reduction devices in Shark Bay, mandatory use of logbook reporting

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
rock lobster, deep sea crab	pots	25	not applicable	not applicable	Western Australian Fishery: four zones on the south coast extending from 34 degrees, 24 min S to the WA/SA border, including an offshore zone	none documented	none documented	C/O, A/G	SLEDs required in all lobster pots, closed areas near known seal colonies	Australia Provided: Attachment F, Western Australian Fisheries	seasonal and spatial closures apply, the primary mammal of concern for this fishery is the Australian sea lion. All areas for 30 km or to 80 km depth around known sea lion colonies are closed to fishing unless pots are fitted with sea lion exclusion devices
rock lobster	pots	295	not applicable	not applicable	year-round; Western Australian Fishery: three zones off the west coast of WA between 21 degrees, 44 min S and 34 degrees, 24 min S	unspecified whales, dolphins, and seals, humpback whale, southern right whale	7 whales (5 released alive, 2 dead), 1 dolphin (fate unknown, 1 seal (dead) (over last 10 years), 35, 2	P, A/G	West Coast Rock Lobster Managed Fishery code of practice for reducing whale entanglements, SLEDs required on pots in specific areas within the fishing zone	Australia Provided: Attachment F, Western Australian Fisheries, MSRA Database:IWC 2010, 2015	pots are required to be fitted with sea lion exclusion devices within certain areas in the fishing area. Measures are in place that fishermen are required to abide by in order to reduce marine mammal interactions. These include gear modifications around the length of rope, the use of negatively buoyant rope and minimum pot retrieval requirements. Fishermen are encouraged to call in whale sightings to assist with whale migration research.
deep sea crabs	pots	5	not applicable	not applicable	year-round; Western Australian Fishery: all waters between 34 degrees, 24 min S, the WA/NT border and the seaward side of the 150m isobath to the Australian Fishing Zone	none documented	none documented	C/O, A/G		Australia Provided: Attachment F, Western Australian Fisheries	required reporting of protected species interactions
giant crab	trap	6	not applicable	not applicable	year-round; Tasmanian Fishery: Tasmanian waters mid-november-october 1; Tasmanian Fishery: predominantly coastal (less than 50m) around the state	none documented	none documented	C/O, A/G		Australia Provided: Attachment G, Tasmanian Fisheries	mandatory reporting of marine mammal interactions however due to design of the gear and nature of operations no incidents have been recorded or are likely to occur
rock lobster	pots	200	not applicable	not applicable		seals	1 mortality 2014 (other non-fatal interactions with gear)	P, A/G	Whale mitigation strategy in development	Australia Provided: Attachment G, Tasmanian Fisheries	risk assessment completed for interactions with seals, assessment results indicated that increasing interactions with migrating humpback whales likely as populations increase. A whale mitigation strategy is currently being developed as a high priority
salmon and ocean trout	aquaculture (cages)	44 leases	none provided	not applicable	year-round; Tasmanian Fishery: Tasmanian coastal waters	seals, common dolphin, bottlenose dolphin	7-25, 4, 1-2 /yr. 2 seal mortalities, 1 humpback whale entanglement (untangled successfully and released alive)	P, A/G	Seal Management Framework	Australia Provided: Attachment G, Tasmanian Fisheries, MSRA Database: IWC 2011	seals are sedated for removal and relocation from aquaculture pens. A Seal Management Framework was established to allow for applying best practice management strategies to reduce seal interactions and address potential risks. Under specialized specific circumstances humane euthanasia of seals is permitted (only when it is a recognized, repeat-offender seal that poses risk to aquaculture workers)
rock lobster	pots	118 licenses (no vessel limit)	not applicable	not applicable	year-round; Victorian Fishery: Victorian coastal waters	seal, humpback whale		P, A/G	voluntary code of practice for reducing whale entanglements	Australia Provided: Attachment H, Victorian Fisheries	year-round with over-lapping closed seasons for male and female lobster, closed areas where fishing is not permitted, fishery has developed a voluntary code of practice for reducing whale entanglements
giant crab	pots	30 licenses	not applicable	not applicable	year-round; Victorian Fishery: Victorian coastal waters	none documented	none documented	C/O, A/G		Australia Provided: Attachment H, Victorian Fisheries	year-round with over-lapping closed seasons for male and female lobster, closed areas where fishing is not permitted

<b>Export Fisheries</b>											
Sharks	gillnet	15	not applicable	not applicable	Territorial Waters	dolphins, west Indian manatee, humpback whale	humpback whale-1	C/O, A/G	ICCAT	<a href="http://www.breakingbelizenews.com/2016/04/25/humpback-whale-dies-southern-belize/">http://www.breakingbelizenews.com/2016/04/25/humpback-whale-dies-southern-belize/</a> <a href="http://www.breakingbelizenews.com/2016/04/25/humpback-whale-dies-southern-belize/">http://www.breakingbelizenews.com/2016/04/25/humpback-whale-dies-southern-belize/</a>	ICCAT, A total of 58 individual shark fishing licenses were issued to fishers in 2016. Also 5 shark export permits were issued. Exports mostly to Honduras and Guatemala. No exports to the U.S.A. from the national fishery. The fishing gear is primarily gill nets and long lines. Fishing for shark is seasonal and is regulated under the Fisheries Act. Closed season from August 1st to October 31st and protected species include the <i>Ginglymostoma cirratum</i> ; <i>Rhincondon typus</i> ; CITES regulated species are <i>Sphyrna lewini</i> and <i>Sphyrna mokarran</i> .

Sharks	longline	15	not applicable	not applicable	Territorial Waters	dolphins, west Indian manatee	none provided	C/O, A/G	ICCAT	<a href="http://www.breakingbelizenews.com/2016/04/25/humpback-whale-dies-southern-belize/">http://www.breakingbelizenews.com/2016/04/25/humpback-whale-dies-southern-belize/</a> Gill nets fishing in Belize occurs primarily within the inner Barrier Reef lagoon. Belize has regulations for allowed total length of one gill net being 100 meters and not more than 300 meters allowed per vessel provided that nets are not joined together. This particular case with the Humpback whale, it was reported couple months earlier that the mammal was stranded in Puerto Barrios Area. The usage of gill nets in Belize is primarily for artisanal fishing and there is no way that whales use the inner Barrier Reef lagoon as their migratory route. <a href="https://whalesandmarinefauna.wordpress.com/2016/04/25/humpback-whale-dies-in-southern-belize/">https://whalesandmarinefauna.wordpress.com/2016/04/25/humpback-whale-dies-in-southern-belize/</a>	ICCAT, A total of 58 individual shark fishing licenses were issued to fishers in 2016. clam spp. ( <i>Tawera gayi</i> )	Manual extraction Diving	0	not applicable	not applicable	All year; Chilean Provinces V to XII	none provided	none provided	A/G	Chile provided		All year. 37164 authorized fishermen [no vessels].
limpet spp. ( <i>Fissurella</i> spp.)	Manual extraction Diving	0	not applicable	not applicable	Regions (Intertidal and subtidal zone) All year (except the closed fishing season); Chilean Provinces XV to XII	none provided	none provided	A/G	Chile provided		All year. 68026 authorized fishermen [no vessels].
Chilean abalone	Manual extraction Diving	0	not applicable	not applicable	XII Regions (Coast, until 50 m deep) All year (except the closed fishing season); Chilean Provinces XV to X	none provided	none provided	A/G	Chile provided		All year (except the closed fishing season). 15079 authorized fishermen [no vessels].
clam spp. ( <i>Mesodesma donacium</i> )	Manual extraction Diving	0	not applicable	not applicable	Regions (Intertidal and subtidal zone) All year (except the closed fishing season); Chilean Provinces III to XII	none provided	none provided	A/G	Chile provided		All year (except the closed fishing season). 11070 authorized fishermen [no vessels].
clam spp. ( <i>Ensis macha</i> )	Manual extraction Diving	0	not applicable	not applicable	Regions (Subtidal zone) All year; Chilean Provinces XV to X	none provided	none provided	A/G	Chile provided		All year (except the closed fishing season). 59533 authorized fishermen [no vessels].
clam spp. ( <i>Tagelus dombeii</i> )	Manual extraction Diving	0	not applicable	not applicable	Regions (Coast and internal waters, until 13 m deep) All year (except the closed fishing season); Chilean Provinces XII	none provided	none provided	A/G	Chile provided		All year. 59533 authorized fishermen [no vessels].
scallop spp. ( <i>Chlamys vitrea</i> )	Manual extraction Diving	0	not applicable	not applicable	Region (Coast and internal waters, until 17 m deep) All year; Chilean Provinces XV to X	none provided	none provided	A/G	Chile provided		All year (except the closed fishing season). 8584 authorized fishermen [no vessels].
sea cucumber spp. ( <i>Athyonidium chilensis</i> )	Manual extraction Diving	0	not applicable	not applicable	Regions (Intertidal and subtidal zone) All year (except the closed fishing season); Chilean Provinces XV to XII	none provided	none provided	A/G	Chile provided		All year. 64413 authorized fishermen [no vessels].
Octopus ( <i>vulgaris</i> , <i>mimus</i> spp.)	Manual extraction Diving	318	not applicable	not applicable	Regions (Subtidal zone) All year (except the closed fishing season); Chilean Provinces XV to XII	none provided	none provided	A/G	Chile provided		All year (except the closed fishing season).
southern red octopus ( <i>Enteroctopus megalocyathus</i> )	Manual extraction Diving	1177	not applicable	not applicable	Regions (Subtidal zone) All year; Chilean Provinces XV to XII	none provided	none provided	A/G	Chile provided		All year (except the closed fishing season).
clam spp. ( <i>Mulinia edulis</i> )	Manual extraction Diving	0	not applicable	not applicable	Regions (Subtidal zone) All year; Chilean Provinces XV to X	none provided	none provided	A/G	Chile provided		All year. 64411 authorized fishermen [no vessels].
clam spp. ( <i>Semele solida</i> )	Manual extraction Diving	0	not applicable	not applicable	Regions (Subtidal zone) All year; Chilean Provinces:	none provided	none provided	A/G	Chile provided		All year. 61058 authorized fishermen [no vessels].
red algae spp. ( <i>Gracilaria</i> spp.)	Aquaculture/Planted directly on bottom or in suspended ropes	587 farms/510 participants	none provided	not applicable	II Antofagasta Region III Atacama Region IV Coquimbo Region VIII Biobio Region IX Araucania Region XIV Los Rios Region X Los Lagos Region XI Aysen del General Carlos Ibañez del Campo Region	none provided	none provided	N/I	Chile provided		Red algae spp. ( <i>Gracilaria</i> spp.) are farmed directly on the seabed. Algae are buried on the marine bottom (sand or mud). There are no farming structures (long line or floating rafts) and the growth process is natural. There is no other activity in the farming area until the harvest. This activity is conducted in intertidal areas (beaches) or in very shallow waters (up to 20 meters). To date there are NO suspended systems to farm algae; it is done directly on the seabed. No interaction or incidental mortality findings have been reported on marine mammals. Exempt fishery is proposed. For photos of the farm operation, please see <a href="https://www.dropbox.com/sh/hlnxq3gj2qnmn4c/AAAHjzvcMi61wuxzym_Na2nFa?dl=0">https://www.dropbox.com/sh/hlnxq3gj2qnmn4c/AAAHjzvcMi61wuxzym_Na2nFa?dl=0</a> .

A., & Antezana, T. (2003). Behavior of the southern sea lion ( <i>Otaria flavescens</i> ) and consumption of the catch during purse-seining for jack mackerel ( <i>Trachurus symmetricus</i> ) off central Chile. ICES Journal of Marine Science: Journal du Conseil, 60(5), 1003-1011. IFOP (2017)	"The number of sea lions observed at a purse-seine ranged between 0 and 50 per set (31 sets), with an average of 21." "During purse-seine operations, killer whales, <i>Orcinus orca</i> , were occasionally attracted into the area (four out of 31 sets), presumably to prey on the sea lions." Chile comment: the gears handline, gillnet and longline were erased, they had been mistakenly informed in the first submission of information. According to Resolution 3115/13 the fishery of Herring with those gears does not exist (http://www.subpesca.cl/portal/616/articles-81856_documento.pdf)

Juan Fernandez rock lobster (Jasus frontalis)	Artisanal Traps	77	not applicable	not applicable	Jan-Feb, Apr-May, and Oct-Dec Archipelago of Juan Fernandez (10 nm)	none provided	none provided	A/G	Chile provided		Given that this crab is harvested by artisanal traps, there is unlikely probability of dead or serious injury to marine mammals. This fishery is certified according to MSC criteria. Number of vessels has been updated, showing now the number of vessel effectively operating during 2016. Possible intentional mortality for the Southern Sea Lion. "Claude and Oporto (2000) estimated that at least 5000 to 6000 South American sea lions were shot, most illegally, during the 1980s and 1990s and they suggested that this reduced some local sea lion populations substantially. The shootings occurred at sea lion colonies as well as fish farms. The Chilean National Fisheries Service issues permits to kill sea lions that are known to cause problems but in some cases the number on the permit exceeds the estimated number of sea lions thought to be resident in the area (Oporto et al. 1991). Sea lions have also been killed or injured by clubbing and poisoning."
Atlantic salmon, coho salmon, rainbow trout	Aquaculture/Sea cages	1361 farms/96 participants	none provided	not applicable	Chilean Provinces: IX Araucania Region XIV Los Rios Region X Los Lagos Region XI Aysen del General Carlos Ibañez del Campo Region XII Magallanes and Antartica Chilena Region	southern sea lion	2004: 10 (region X)	P	Chile provided; Vilata J, Oliva D, Sepulveda M (2010) The predation of farmed salmon by South American sea lions (Otaria flavescens) in southern Chile. ICES Journal of Marine Science 67:475-482; Heinrich, S. 2012; Hindell, M., & Kirkwood, R. (2003). Marine Mammals: Fisheries, Tourism and Management Issues. CSIRO PUBLISHING. Referencing Claude, M., and Oporto, J. A. 2000. La ineficiencia de la salmonicultura en Chile. In 'Registro de Problemas Publicos Informe No. 1.' pp. 68. Terram Publicaciones, Santiago de Chile.	Regarding salmon and trout farming, the production is concentrated on the southern regions of Chile. In this case, we can say that there are sea lion nets surrounding every cage, with the objective of reducing significantly the probability of these mammals to enter the farming centers and keeping them away from the fish. It is important to note that from 2010, the industry started to reduce the mesh opening to 10-12 inches to minimize the entangling of sea lions. Although there is interaction with marine mammals, the probability of this resulting in harm or threat to the life of marine mammals is insignificant and its impact is minimal due to the abundance of marine mammals populations in the regions where the salmon and trout production is concentrated (X, XI, and XII Regions). Chile would like to propose an

Trawling is prohibited within 12 nautical miles from the baselines
salmon, Atlantic	aquaculture	There are three aquaculture companies producing salmon in the Faroe Islands in 25 farming areas within the fjords and sounds of the Faroe Islands.	P/F Bakkafrost, P/F Luna (Hiddenfjord) and P/F Marine Harvest Faroes	Atlantic salmon, farmed	There are 25 areas for salmon farming in the fjords and sounds of the Faroe Islands	Registered removal of grey seals, when they attempt to tear the nets	None provided	P	The Faroese Government and aquaculture companies are making great efforts to improve statistics and limit injury and mortality of marine mammals in relation to aquaculture.		There is no bycatch of marine mammals in aquaculture in the Faroe Islands. However, it is reported that salmon farmers in some cases remove grey seals from farming sites when the seals threaten and tear the nets. A reporting system, implemented in the Faroes to obtain estimates of removals of grey seals at salmon farms, indicate removals of about 100 seals per year in relation to aquaculture. See also GSI (Global Salmon Initiative) sustainability report with information on the total number of mammal mortalities per farming site.
smelts - Greater Silver smelt	trawl	6	Sp/f Tavan	wild caught, Faroese vessels	Faroe Islands EFZ	None documented	None documented	A/G	U.S. Trade Data		The way the Faroese fishery is managed, there is no by-catch of whale or seal (Marine Mammal Interaction) in the fishery in Faroese waters, because fishing net is prohibited in shallow waters down to 380 meters. Trawling is prohibited within 12 nautical miles from the baselines.

Baltic herring ( <i>Clupea harengus membras</i> )	trawl	About 70	Not applicable	Not applicable	Main part of catch in northern Baltic Sea (sub-divisions 28, 29, 30, 31 and 32) Finnish terr. waters and EEZ of northern Baltic Sea (sub-divisions 29, 30, 31 and 32)	grey seals	none documented	C/O, A/G	Reg. 2187/2005	U.S. Trade Data; and email from Orian Bondestam, Finland Ministry of Agriculture and Forestry	Grey seals may at instances cause damage to cod ends of pelagic trawls when trying to take caught herring. Seals are however not caught as bycatch in the trawls. Finland had observers onboard pelagic trawlers in our waters 2006 and 2007. The observers did not observe any bycatch of marine mammals or any cetaceans in the waters during this scheme. The marine aquaculture production facilities (cages) are protected against grey seal and ringed seal interactions with strong outer protective nets and hence there are no reports on harmed seals. Same comment as above on harbor porpoise.

Atlantic cod (Gadus morhua)	trawl	approx. 5	Not applicable	Not applicable	Swedish, Danish and Polish EEZ of Baltic Main Basin (sub-divisions 24-26)	none	none	C/O, A/G	Technical measures of the Common Fisheries Policy (CFP) of the European Union (Council Regulation 2187/2005). According to its Article 9 the use of driftnets are totally prohibited in the Baltic Sea as from 1.1.2008.	U.S. Trade Data	No data to indicate interactions with grey seals or harbor porpoise that have lead to injury or mortality. Driftnets are totally prohibited in the Baltic Sea as from 1.1.2008. Se Eu Regulation 2187/2005 Article 9. <a href="http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2005:349:0001:0023:EN:PDF">http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2005:349:0001:0023:EN:PDF</a>

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
Atlantic cod	bottom-gillnet, sets	approx. 10	Not applicable	Not applicable	Finnish terr. waters and EEZ of northern Baltic Sea (sub-divisions 29 and 32)	grey seals	none	A/G	Reg. 2187/2005	U.S. Trade Data	No data to indicate interactions with grey seals or harbor porpoise that have lead to injury or mortality. Harbor porpoise are only rarely sighted in the Finnish EEZ (2-3 times a year) while their main distribution area is in the southern Baltic Sea (sub-divisions 22-26). There are no reports of bycatches of harbor porpoise in the Finnish fisheries. See report from 2016 <a href="http://www.sambah.org/SAMBAH-Final-Report-FINAL-for-website-April-2017.pdf">http://www.sambah.org/SAMBAH-Final-Report-FINAL-for-website-April-2017.pdf</a> . Driftnets are totally prohibited in the Baltic Sea as from 1.1.2008. See Eu Regulation 2187/2005 Article 9.
Baltic herring ( <i>Clupea harengus membras</i> ) and its eggs	trap nets and gillnet	Hundreds of small vessels	Not applicable	Not applicable	Finnish terr. waters and EEZ of northern Baltic Sea (sub-divisions 29, 30, 31 and 32)	grey and ringed seals	none documented	C/O, A/G	Reg. 2187/2005	U.S. Trade Data; and email from Orian Bondestam, Finland Ministry of Agriculture and Forestry	Grey seals and ringed seals interact with trapnets and gillnets by taking fish from them and damaging the nets. There are no reports of bycatches of seals in these fishing gear which are made of netting that seals can break. Same comment as above on harbor porpoise. Driftnets are totally prohibited in the Baltic Sea as from 1.1.2008. See Eu Regulation 2187/2005 Article 9.
salmon ( <i>Salmo salar</i> )	trap nets	approx. 250 small vessels	Not applicable	Not applicable	Finnish terr. waters and EEZ of northern Baltic Sea (sub-divisions 29, 30, 31 and 32)	greys seals and ringed seals	occasional	C/O, P, A/G	Reg. 2187/2005	U.S. Trade Data	Grey seals and ringed seals interact with trapnets by taking fish from them and damaging the nets. There are occasional bycatches of seals in these fishing gear although they are made to withstand seal interactions to keep them out and the netting is often made of Dynema. Same comment as above on harbor porpoise. Driftnets are totally prohibited in the Baltic Sea as from 1.1.2008. See Eu Regulation 2187/2005 Article 9.
whitefish ( <i>Coregonus</i> sp.)	trap nets and gillnet	Hundreds of small vessels	Not applicable	Not applicable	Finnish terr. waters and EEZ of northern Baltic Sea (sub-divisions 29, 30, 31 and 32)	grey and ringed seals	occasional in trapnets	C/O, P, A/G	Reg. 2187/2005	Source: email from Orian Bondestam, Finland Ministry of Agriculture and Forestry	Grey seals and ringed seals interact with trapnets by taking fish from them and damaging the nets. There are occasional bycatches of seals in these fishing gear although they are made to withstand seal interactions to keep them out and the netting is often made of Dynema. The gillnets are made of weak thinthreaded nets that are harmless for seals. Same comment as above on harbor porpoise. Driftnets are totally prohibited in the Baltic Sea as from 1.1.2008. See Eu Regulation 2187/2005 Article 9.
perch ( <i>Perca fluviatilis</i> )	trap nets and gillnet	Hundreds of small vessels	Not applicable	Not applicable	Finnish terr. waters and EEZ of northern Baltic Sea (sub-divisions 29, 30, 31 and 32)	grey and ringed seals	none documented	C/O, A/G	Reg. 2187/2005	Source: email from Orian Bondestam, Finland Ministry of Agriculture and Forestry	Grey seals and ringed seals interact with trapnets and gillnets by taking fish from them and damaging the nets. There are no reports of bycatches of seals in these fishing gear which are made of netting that seals can break. Same comment as above on harbor porpoise. Driftnets are totally prohibited in the Baltic Sea as from 1.1.2008. See Eu Regulation 2187/2005 Article 9.
pikeperch ( <i>Stizostedion lucioperca</i> )	trap nets and gillnet	Hundreds of small vessels	Not applicable	Not applicable	Finnish terr. waters and EEZ of northern Baltic Sea (sub-divisions 29, 30, 31 and 32)	grey and ringed seals	none documented	C/O, A/G	Reg. 2187/2005	Source: email from Orian Bondestam, Finland Ministry of Agriculture and Forestry	Grey seals and ringed seals interact with trapnets and gillnets by taking fish from them and damaging the nets. There are no reports of bycatches of seals in these fishing gear which are made of netting that seals can break. Same comment as above on harbor porpoise. Driftnets are totally prohibited in the Baltic Sea as from 1.1.2008. See Eu Regulation 2187/2005 Article 9.
pike ( <i>Esox lucius</i> )	trap nets and gillnet	Hundreds of small vessels	Not applicable	Not applicable	Finnish terr. waters and EEZ of northern Baltic Sea (sub-divisions 29, 30, 31 and 32)	grey and ringed seals	none documented	C/O, A/G	Reg. 2187/2005	Source: email from Orian Bondestam, Finland Ministry of Agriculture and Forestry	Grey seals and ringed seals interact with trapnets and gillnets by taking fish from them and damaging the nets. There are no reports of bycatches of seals in these fishing gear which are made of netting that seals can break. Same comment as above on harbor porpoise. Driftnets are totally prohibited in the Baltic Sea as from 1.1.2008. See Eu Regulation 2187/2005 Article 9.

Lobster, Caribbean spiny lobster, Caribbean Spotted Spiny lobster	traps, Antillean Z traps to Florida wooden traps.	500 licensed artisanal fiberglass vessels (15 ft. to 33 ft. LOA) of which 15 are licensed large scale steel hull vessels (50ft – 85ft)	None provided	None provided	Pedro bank mainly; Island shelf -- Annual Closed Season for lobsters from April 1 to June 30.	dolphin	none documented	A/G	Member Country for Cartagena Convention, but did not sign the Protocol for Specially Protected Areas and Wildlife	Provided by Government of Jamaica	Jamaica has virtually no history of marine mammal interaction which causes injury or incidental mortality due to the deployment and retrieval of fishing gears. However it is reported that dolphins or porpoises often destroy Antillean Z traps set by fishers in some areas. It is thought that this is an attempt by these mammals to damage the traps and release the fish for consumption. Analogous fishery Category III Caribbean spiny lobster trap pot
Queen Conch	Diving Hookah (dive compressors) and SCUBA  Free lung diving is also employed in coastal and inshore areas	11 large scale industrial vessels	None provided	None provided	Pedro bank mainly; Island shelf -- Annual Closed Season for conch from August 1 to March 31 following year	none documented	none documented	A/G		Provided by Government of Jamaica	Although exports have been reduced, it is expected that the respective industries will re-develop and will continue exports to the US and other countries within the next five years. There is no history of marine mammal interaction which causes injury or incidental mortality by the diving for conch.
Sea cucumbers	Diving (Proposed to be Diving only; free lung, dive compressors and SCUBA)	None currently. 3 exploratory fishing licenses are being considered	None provided	None provided	Pedro bank, island shelf and proximal banks of Jamaica -- There has been one closed season period designated for sea cucumbers in the past but this has expired. There is no current Closed Season.	none documented	none documented	A/G		Provided by Government of Jamaica	Due to the specificity of diving for this and similar highly resources, Jamaica expects to have no cases of marine mammal interaction which causes injury or incidental mortality. The Statistical Institute of Jamaica and the Jamaica Customs Agency are the only organizations that have records of countries exporting fish and fish products to Jamaica either for processing or re-export. It will take additional time for the Fisheries Division to access this information and submit to the NOAA-NMFS as this is not normally captured by our data system and may have to be retrieved at a cost.

#### Lithuania

Export Fisheries											
snow crab	cages	3	not applicable	not applicable	Barents Sea (NEAFC 27.1.a)	Baikal seal, Cetaceans	None documented	A/G, C/O		EU submitted spreadsheet	

Target Species or Product	Fishery/Gear Type	Number of Vessels	Company (if aquaculture or processor)	Source of Product (for processing)	Area of Operation	Marine Mammal Interactions (by group or species)	Marine Mammal Bycatch Estimates	Rationale for Classification ** (Presence of mortality or injury (P/A), Co-Occurrence (C/O), Analogous Gear (A/G), No Information (N/I))	RFMO or Legal Protection Measures	References	Detailed Information
redfish	Trawl	1	not applicable	not applicable	Barents Sea, Northeast Atlantic, and Greenland Sea (IIa; XII; XIV)	Cetaceans	None documented	A/G, C/O	ASCOBANS	EU submitted spreadsheet	Fisheries employing scientific observer coverage
jack mackerel	Trawl	1	not applicable	not applicable	Southeast Pacific (FAO 87)	Cetaceans	None documented	A/G, C/O	ASCOBANS	EU submitted spreadsheet	Fisheries employing scientific observer coverage
northern shrimp	trawl, bottom	2	not applicable	not applicable	Barents Sea, Norwegian Sea (27 Ia, II2, Ib)	white-beaked dolphin, baleen whales, harp seal	None documented	A/G, C/O	ASCOBANS	EU submitted spreadsheet	The fishery is carried out near the bottom in very deep water (from 300m to 500 m.), therefore there is virtually no chance that birds or marine mammals are encountered when the net is at the fishing depth. The only possible moment of encounter would be when the net is hauled in and birds or marine mammals would be attracted by the fish in the net. This however seems unlikely in a shrimp fishery with very limited bycatch.
Atlantic herring, Atlantic sprat	trawl, pelagic pair	3	not applicable	not applicable	Baltic Sea (FAO Zone 27.3)	Harbor porpoise	None documented	A/G, C/O	ASCOBANS	EU submitted spreadsheet	Lithuanian vessels is operating on the edge of species distribution area in the Baltic
Atlantic herring, Atlantic sprat	trawl, pelagic midwater otter	23	not applicable	not applicable	Baltic Sea (FAO Zone 27.3)	Harbor porpoise	None documented	A/G, C/O	ASCOBANS	EU submitted spreadsheet	Lithuanian vessels is operating on the edge of species distribution area in the Baltic
Atlantic cod	gillnet	64	not applicable	not applicable	Baltic Sea (FAO Zone 27.3)	gray seal, possible harbor porpoise interactions	None documented	A/G, C/O	ASCOBANS	EU submitted spreadsheet, and worldwide bycatch of cetaceans/appendix	The fishery is carried out near the bottom, therefore there is no chance for the bycatch of gray seal. Lithuanian vessels is operating on the edge of harbor porpoise distribution area in the Baltic.
Atlantic cod	trawl, bottom otter	20	not applicable	not applicable	Baltic Sea (FAO Zone 27.3)	Harbor porpoise, gray seal	None documented	A/G, C/O	ASCOBANS	EU submitted spreadsheet

### Malta

Exempt Fisheries											
Bluefin tuna	Aquaculture, with fish sourced from other nations' Purse Seine vessels	not applicable	5 farms	Not applicable	Mediterranean Sea (FAO Zones 37)	no information	no information			EU submitted spreadsheet	For farmed BFT, the information provided through this table is related to the effect of the Maltese BFT Farming Sector on Marine Mammals. BFT Farmed in Malta is sourced from the wild through Purse Seine catches of other countries. Any effect on marine mammals through these purse seining operations should come from the relevant catching flag states.

Export Fisheries											
Bluefin tuna, albacore, bullet tuna, bonito, mahi mahi, little tunny	longline	40	not applicable	not applicable	Mediterranean Sea and Atlantic regions (FAO Zones 37)	possible false-filler whale, Risso's dolphin interactions	no information	A/G,C/O		<a href="https://www.iccat.int/Documents/BienRep/REP_EN_14-15_I-2.pdf">https://www.iccat.int/Documents/BienRep/REP_EN_14-15_I-2.pdf</a> ; and EU submitted spreadsheet, and worldwide cetacean bycatch/appendices	For the BFT longline fleet, the number of vessels is the number of units with positive BFT effort for the past five years (value provided is the average based on a 5 year period dataset). Data Source for number of vessels with positive BFT effort is ICCAT catch and effort data. Data source on any relevant marine mammal incidental injury and mortality during longline operations comes from on-board observers deployed in line with ICCAT Recommendations.

Export Fisheries											
Peruvian anchoveta, sardines	purse seine	commercial large scale (872)	not applicable	not applicable	May-July, Nov-Jan Artisanal: Peru EEZ all provinces	South American sea lion, Burmeister's porpoise, common dolphin, long-beaked common dolphin, dusky dolphin, bottlenose dolphin, South American fur seal	Bycatch numbers given but not specific to fishery. Please see note at top of comments for references.	P, A/G	IWC, CPPS, CMS, CBD	Peru provided (Annexes 3 & 6)	Mesh size: purse seine of 13 mm long mesh Around 9% of the interaction events resulted in bycatch, ranging from 1 to 12 individuals captured per set. 93% of the captures occurred in sets that lasted between 1.18 to 2.93 hours. When cetaceans were captured estimated dolphin school size varied from 12 to 300 individuals. A capture rate per set for each month of 0 to 0.11 (average = 0.041; SD = 0.037) dolphins was estimated, with the highest capture rate in January. Since fishing trips could total around 80000 a year, cetacean captures could potentially reach considerable numbers.

Humboldt squid	purse seine	none provided	not applicable	not applicable	Artisanal: Peru EEZ all provinces and on high seas	long-beaked common dolphin, dusky dolphin, South American fur seal	Bycatch numbers given but not specific to fishery. Please see note at top of comments for references.	P, A/G		Peru provided (Annex 3)	
shark, blue, shortfin mako, hammerhead	gillnet	none provided	not applicable	not applicable	Artisanal: Peru EEZ all provinces and on high seas	South American sea lion, Burmeister's porpoise, long-beaked common dolphin, dusky dolphin, South American fur seal	Bycatch numbers given but not specific to fishery. Please see note at top of comments for references.	P, A/G		Peru provided (Annex 3)	gillnets also entangle humpback, sperm and minke whales (Garcia-Godos et. al Pacific Science (2013), vol. 67, no. 4:523 – 532 )
shark, blue, shortfin mako, hammerhead	longline	none provided	not applicable	not applicable	April-Dec; Artisanal: Peru EEZ all provinces and on high seas	Short-beaked common dolphins	Bycatch numbers given but not specific to fishery. Please see note at top of comments for references.	P, A/G		Peru provided (Annex 3)	small cetaceans including common dolphins and dusky dolphins are intentionally killed for bait
Hammerhead shark	purse seine	none provided	not applicable	not applicable	April-Dec; Artisanal: Peru EEZ all provinces and on high seas	Burmeister's porpoise, long-beaked common dolphin, dusky dolphin, South American fur seal	Bycatch numbers given but not specific to fishery. Please see note at top of comments for references.	P, A/G		Peru provided (Annex 3)	
shark, blue, shortfin mako, hammerhead, thresher, angel, rays, bonito, dolphinfish	driftnet	none provided	not applicable	not applicable	April-Dec; Artisanal: Peru EEZ all provinces and on high seas	South American sea lion, Burmeister's porpoise, long-beaked common dolphin, dusky dolphin, bottlenose dolphin, South American fur seal	Bycatch numbers given but not specific to fishery. Please see note at top of comments for references.	P, A/G		Peru provided (Annex 3), Mangel et. al. Using Pingers to reduce bycatch of small cetaceans in Peru's small-scale driftnet fishery	23 common dolphins and two dusky dolphins were observed to be harpooned, for use as bait on subsequent sets. This typically occurred as vessels were travelling to the fishing ground prior to the first fishing set. Harpooning was infrequent, occurring on 10 trips (11%) and with 1–4 individuals per event and only on trips primarily targeting blue and mako sharks. Twenty common dolphins were harpooned during seven trips that used pingers and two dusky dolphins and three common dolphins were harpooned during three control trips.

Export Fisheries											
Anchovy (including Commerson's)	Purse seine	237 (target: anchovy and pelagic fishes)	Not applicable	Not applicable	Offshore Gulf of Thailand/Andaman Sea	none provided	none provided	N/I, A/G		Thailand provided, U.S. Trade Data	Protection and Conservation Wildlife Act, B.E. 2535 (1992) - prohibition of hunting of sp of marine mammal. In addition, other threats were directly and indirectly from human activities, including marine pollutions, marine debris as well as incidental catches of fishing. However, 5-year statistics showed that fishing activities had no impact to population changes of the marine mammals (2011 to 2015, average of 100.2 ± 51.2 tail/year). (average numbers of stranded dugongs during 2011 to 2016 was 12.2±4.3 tails/year). It can be considered that the numbers of stranded dugongs were steady. Problem/cause for the stranding of dugongs by fishing gears was 50 – 72 %, mainly by coastal gillnets as well as other fisheries.

tuna, swordfish	longline	0	Caicos Pride	TCI	Turks and Caicos Islands EEZ	none documented	none documented	A/G		U.S. Trade Data	The export of pelagic species was associated with a study using longlines. This study was halted and there are currently no commercial pelagic fisheries operating in the Turks and Caicos. The fishing at the time was by Day Boat fisheries from the US under an access agreement and due to the vessels being US flagged, they were required to fish under US regs for Highly Migratory Species as well as TCI regs.
