

ALABAMA DEPARTMENT OF CONSERVATION AND NATURAL RESOURCES - MARINE RESOURCES DIVISION

NOAA FISHERIES RECREATIONAL RED SNAPPER EXEMPTED FISHERY PERMIT (No. 18-SERO-02) STATUS REPORT

Report Period: June 1 – July 22, 2018

Report Date: September 26, 2018

The information provided in this report complies with reporting requirements associated with the NOAA Fisheries Red Snapper Exempted Fishery Permit (EFP) issued to the Department of Conservation and Natural Resources-Marine Resources Division (DCNR/MRD) for 2018 and 2019. Data included in this report are derived from mandatory angler reported data and dockside surveys of Red Snapper anglers by DCNR/MRD staff. Fishery landings were monitored in-season using angler supplied data adjusted for non-response through dock-side sampling of fishing vessels with Red Snapper harvest. The fishery was open through July 22, 2018 which was much earlier than the projected season closure date of September 4, 2018. Therefore, this status report represents the final report to NOAA Fisheries to meet the EFP reporting requirement. For more information about the EFP visit www.outdooralabama.com/saltwater-fishing/exempted-fishing-permit.

Report Period Synopsis

Although the last day of the season was windy, generally favorable fishing conditions occurred throughout the month of July. The good weather contributed to high harvest rates and a greater number of participants compared to last year. Upon season conclusion, DCNR/MRD staff have scrutinized the reported landings data and dockside data to check for potential mis-keyed information. Data were checked through various QA/QC procedures including computer data check programs and visual inspection of reported charter data. Although apparent reporting errors were relatively infrequent the highest proportion of these errors included those where unusually high numbers of harvested fish or anglers for the number of anglers or harvested fish reported. Data was amended to match typical trip passenger or harvest amounts as deemed necessary. Another error encountered during the QA/QC process were incorrect US Coast Guard vessel registration numbers provided for reports submitted as charter fishing trips. To identify these errors data was sorted by vessel registration number, date of report, and reported trip type. Within the sorted data vessels with similar vessel registration numbers were readily identified. The vessel registration numbers for similarly matched reports were compared to the charter vessel permit database. If a vessel registration number did not match a vessel in the permit database it was checked to determine if it was a valid registration number using NOAA Fisheries' copy of the US Coast Guard's vessel database (<https://www.st.nmfs.noaa.gov/st1/CoastGuard/VesselByID.html>). If the vessel registration number for the vessel matched a vessel that had a home port in the Gulf of Mexico the registration number remained as recorded. If, however, the registration number provided on the landing report was not valid or matched a registration number for a vessel with a home port outside the Gulf of Mexico the date of the landings report(s) from that vessel were compared to the date of landing report(s). If the date and time of report(s) did not overlap or conflict with

the date and time of report(s) for the confirmed federal charter vessel and the number of anglers were similar the registration number for the unconfirmed vessel was edited to match the confirmed vessel.

Summary statistics for the 2018 season including the number of landings reports, angler trips, harvested Red Snapper, estimated total angler trips, harvested Red Snapper, mean weight and landings estimates are provided in Table 1. Ninety-four percent of the landings reports and ninety-six percent of the estimated landings were attributed to private vessels. From landings reports, mean Red Snapper harvest per angler trip for the 2018 season was 1.68 for private vessel anglers and 1.78 for state charter vessel anglers. The average weight of all Red Snapper sampled from private and state charter vessels was 8.06 pounds. Final reporting rates for Red Snapper private vessels and state charter vessels were estimated to be 42.9% and 60%, respectively.

Table 1. Summary of 2018 Snapper Check data supplied by reporting captains/vessel representatives and estimates of angler trips, harvested Red Snapper, mean weight, and landings for private and state-licensed only charter vessels.

Fishing Mode	No. of Angler Reports	No. of Reported Anglers	No. of Reported Harvested Fish	Angler and Harvested Fish Adjustment Factor for Non-reporting	Adjusted Angler Trips	Adjusted Harvested Fish	Mean Weight (LBS)	Estimated Landings (LBS)
Private	5,604	25,240	42,489	2.76	69,634	117,239	8.10	949,151
State Charter	355	1,569	2,800	1.80	2,823	5,146	7.22	37,147
TOTALS	5,959	26,809	45,289	2.71	72,457	122,385	8.06	986,298

Final estimates of Red Snapper harvest for 2017 and 2018 are provided in Figure 1. In 2018, the final harvest of private and state charter vessels was 986,298 pounds which is 2,007 pounds greater than the 2018 quota.

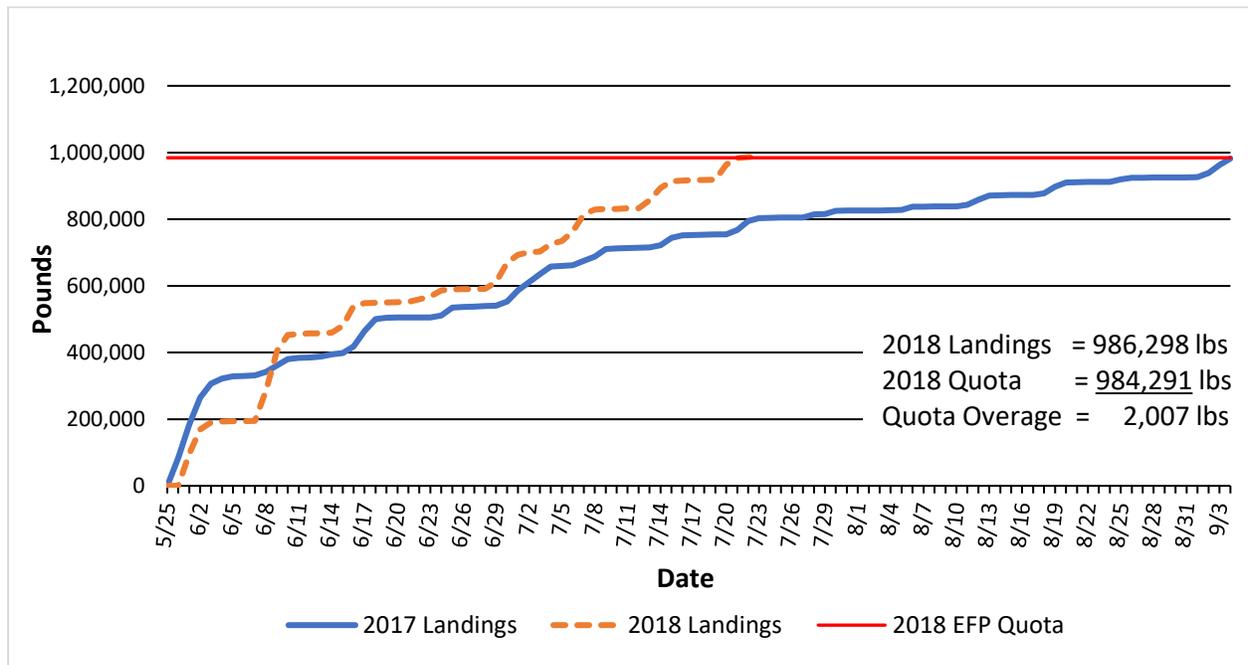

Figure 1. Alabama cumulative recreational Red Snapper landings from Snapper Check for the 2017 and 2018 seasons.

The overage from this season will be deducted from the 2019 quota prior to calculating the state season. The reported and estimated unreported landings are provided in Figure 2. Estimated landings from submitted landing reports represent nearly 37% of the overall landings. Half of the 268 private vessels with Red Snapper recorded by DCNR/MRD staff conducting the complimentary dockside survey had no landings report submitted for the interview day. DCNR/MRD staff will continue to promote Snapper Check and remind anglers of the requirement to report Red Snapper prior to landing the fish in Alabama. A summary of the vessel registration numbers associated with Red Snapper landing reports submitted during July is attached to this report.

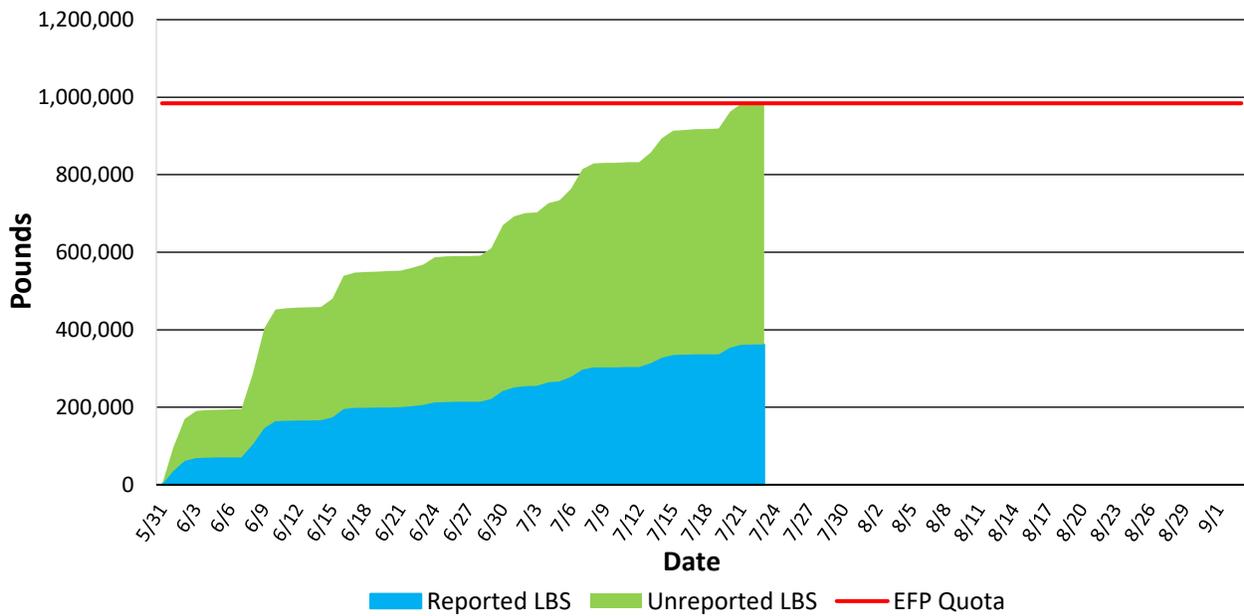

Figure 2. Cumulative daily recreational Red Snapper landings from the 2018 Red Snapper season for reported trips and estimated unreported trips.

REPORTING VESSEL SUMMARY

Vessel registration numbers provided on Red Snapper landing reports submitted July 1-22, 2018.

The list comprises 1,351 unique vessel registration numbers.

At least one landing report was submitted for each vessel registration number listed.

Note: Forty-two (42) paper reports were received during the report period which had an incomplete or missing vessel registration number. A registration number is required in order for the report to be accepted by the landings database. Therefore, an unissued Alabama vessel registration number was entered for these reports.
