

Amendment 91 to the Fishery and Management Plan for
Groundfish of the Gulf of Alaska

Additions are in bold.

Revise the following in chapter 3 Conservation and Management Measures:

- 1. Add the grenadier row to table 3-1 and the grenadiers paragraph to section 3.1.2, 2. Ecosystem Component, to read as follows:**

3.1.2 Stocks

* * * * *

2. Ecosystem Component:

- Prohibited Species – are those species and species groups the catch of which must be avoided while fishing for groundfish, and which must be immediately returned to the sea with a minimum of injury except when their retention is authorized by other applicable law or when their retention is required under section 3.6.1.2 (see also Prohibited Species Donation Program described in Section 3.6.1.1.). Groundfish species and species groups under the FMP for which the quotas have been achieved shall be treated in the same manner as prohibited species.
- Forage fish species – are those listed in Table 3-1, which are a critical food source for many marine mammal, seabird and fish species. The forage fish species category is established to allow for the management of these species in a manner that prevents the development of a commercial directed fishery for forage fish. Management measures for this species category will be specified in regulations and may include such measures as prohibitions on directed fishing, limits on allowable bycatch retention amounts, or limitations on the sale, barter, trade or any other commercial exchange, as well as the processing of forage fish in a commercial processing facility.
- Grenadiers** – are those species listed in Table 3-1, which are abundant on the continental slope and have ecological importance to this habitat. The grenadier species category is established to address the incidental catch of grenadiers in the groundfish fisheries. Management measures are specified in regulations and may include such measures as prohibitions on directed fishing, limitations on allowable retention amounts, or limitations on the sale, barter, trade, or any other commercial exchange, as well as the processing of grenadier in a commercial processing facility.

Table 3-1 Species included in the FMP species categories

In the Fishery	
Target Species ²	Walleye Pollock Pacific cod Sablefish Flatfish (shallow-water flatfish, deep-water flatfish, rex sole, flathead sole, arrowtooth flounder) Rockfish (Pacific ocean perch, northern rockfish, shortraker and rougheye rockfish, other slope rockfish, pelagic shelf rockfish, demersal shelf rockfish ³ , thornyhead rockfish) Atka mackerel Skates (big skates, longnose skates, and other skates) Squid Sculpin Shark Octopus
Ecosystem Component	
Prohibited Species ¹	Pacific halibut Pacific herring Pacific salmon Steelhead trout King crab Tanner crab
Forage Fish Species ⁴	Osmeridae family (eulachon, capelin, and other smelts) Myctophidae family (lanternfishes) Bathylagidae family (deep-sea smelts) Ammodytidae family (Pacific sand lance) Trichodontidae family (Pacific sand fish) Pholidae family (gunnels) Stichaeidae family (pricklebacks, warbonnets, eelblennys, cockscombs, and shannys) Gonostomatidae family (bristlemouths, lightfishes, and anglemouths) Order Euphausiacea (krill)
Grenadiers⁴	Pacific grenadier Popeye grenadier Giant grenadier

¹ Must be immediately returned to sea with a minimum of injury except when their retention is authorized by Section 3.6.1.2 or other applicable law.

² TAC for each listing. Species and species groups may or may not be targets of directed fisheries.

³ Management delegated to the State of Alaska.

⁴ Management measures for forage fish **and grenadiers** are established in regulations implementing the FMP.

* * * * *

2. Add the following text to Appendix A.1, after Amendment 90, to read as follows:

* * * * *

Amendment 91, implemented on [insert date], effective on [insert date]:

Adds grenadiers to the ecosystem component category in section 3.1.2 and in Table 3-1.
