

# Gulf of Mexico Historical Commercial Landings and Annual Catch Limits (ACLs)

This page was updated on 8/19/2019

All 2019 landings reported on this page are considered preliminary. ACTs and ACLs were defined in 2012. Before establishing ACLs/ACTs in 2012, stocks below were subject to quotas.

This page provides only a summary of the information regarding the existing regulations. Any discrepancies between this information and the regulations as published in the *Federal Register* will be resolved in favor of the *Federal Register*.

This page was updated 9/3/2019

Goliath Grouper and Nassau Grouper are closed to harvest.

**Definitions:**

ACL = Annual Catch Limit

ACT = Annual Catch Target

ww = whole weight; gw = gutted weight

NA = not applicable

Species and species groups are listed below in alphabetical order.

Cobia East Florida*									
Year	Fishing Year	Total Reported	Units	ACT	ACT %	ACL	ACL %	Closure Date	Data Source
2018	Jan 1 - Dec 31	32,792	as reported	70,000	46.8	NA	NA		ACL_FILES_08092019
2017		41,000		70,000	58.6				
2016		48,573		70,000	69.4				
2015		62,464		70,000	89.2				

\*The Florida East Coast Zone (east coast of Florida and Atlantic side of the Florida Keys) is part of the Gulf of Mexico stock but management has been delegated to the South Atlantic Fishery Management Council.

Deep Water Grouper*									
Deep Water Grouper: Warsaw grouper, snowy grouper, speckled hind, and yellowedge grouper

\*Shallow water grouper are managed under a stock ACL, meaning both commercial and recreational landings contribute towards total landings. Please see the stock page for additional information. During 2004-2009, the SWG quota was comprised of gag, red grouper, yellowmouth grouper, yellowfin grouper, red hind, rock hind, black grouper, and scamp. Beginning in 2010, gag and red grouper were removed.
