Find a Fishing Access Site

There are more than 300 public saltwater fishing access sites in New York. You can search for them all—and find out whether amenities like tackle shops and restaurants are nearby—through the **Marine Recreational Information Program Site Register**. This free online database lists thousands of places to fish from Maine through Louisiana. The site register also helps determine where and when field interviewers from the New York Division of Marine Resources will conduct angler surveys to estimate recreational catch.

Visit countrymyfish.noaa.gov, open the site register, and click “Guest Login” to start searching.

300+
Public Fishing
Access Sites
in NY

With the Site Register, Anglers Can:

- Search for a site by state, county, ZIP code, or name.
- View site features, like the number of boat ramps and parking spaces, or the availability of cleaning stations.
- Email SR.Admin@noaa.gov to share information that helps us keep the site register up to date.
