FOOTNOTES

- 1 If the bycatch amount for a species is reported as 0, the estimated bycatch amount was less than 0.01 lbs but greater than 0 lbs.
- 2 In fisheries with 100% coverage, we estimated CV's to be zero, as the amount of uncertainty is too small to detect with confidence. We do not report CV's for a small number of protected fish species, as data at the level of aggregation needed for this report were unavailable.
- 3 CV's are not currently available for some protected and prohibited species.
