

Port and Port Groups used to determine standard prices for observer fees

Ports and port groups are used by National Marine Fisheries Service (NMFS) Alaska Region to develop the appropriate standard prices in the fee assessment for observer coverage in the partial coverage category of the North Pacific Groundfish and Halibut Observer Program. The standard prices are available on the Observer Program website.

When calculating the observer fee, NMFS will use the Standard Ex-vessel Prices at the port-level if possible. However, if a port-level price does not meet the confidentiality requirements, the data are aggregated by port-group in hierarchical “tiers” that get geographically larger as the tier numbers increase. Port-group data are first aggregated by regulatory area in the GOA (Eastern GOA, Central GOA, and Western GOA) and by subarea in the BSAI (BS subarea and AI subarea). Port-group data for Southeast Alaska (SEAK) and the Eastern GOA except Southeast Alaska (EGOAxSEAK which includes Cordova, Whittier, and Yakutat) also are presented separately when price data is available. If confidentiality requirements are still not met by aggregating prices across ports at these levels, the prices are aggregated at the level of BSAI or GOA, then statewide (AK) and ports outside of Alaska (OTAK), and finally all ports including those outside of Alaska (“ALL”).

There will be situations when the Port Code of the processor is not listed on the Standard Ex-vessel Prices. In these cases, the Port Group will determine which fee applies to the landing. For example, if a landing of Quillback rockfish occurs in Whittier (WHT) that specific port is not listed in the 2013 Standard Ex-vessel Prices information because landing information on Quillback rockfish in Whittier are confidential. To determine which price applies, you would look at the next largest area (next largest Tier) in the port groups listed for Whittier, which is Eastern Gulf of Alaska excluding Southeast (EGOAxSE). Therefore in 2013, a standard fee of \$0.35 (the Eastern GOA excluding Southeast price) would be applied to the Quillback rockfish landed by a vessel using hook-and-line, pot, or jig gear in Whittier.
