

**Apportionment of the Groundfish Reserves in the BSAI from 1988-2020**

For more information on how reserves are calculated please see full harvest specifications.

Grey lines represent species that are still in the reserves but have moved to another species group or are no longer managed by the same management areas.

Orange lines represents species that were once part of the reserves but no longer are.

Squids were moved to the ecosystem component  
\*Reserves were added to arrowtooth flounder above TAC. As a result TAC was reallocated between ITAC and CDQ.

**Apportionment of the Groundfish Reserves in the BSAI from 1988-2020**

For more information on how reserves are calculated please see full harvest specifications.

Grey lines represent species that are still in the reserves but have moved to another species group or are no longer managed by the same management areas.

Orange lines represents species that were once part of the reserves but no longer are.
